7.4 View order

- Click on **View** button

- A table with products in associated with that order will show up.

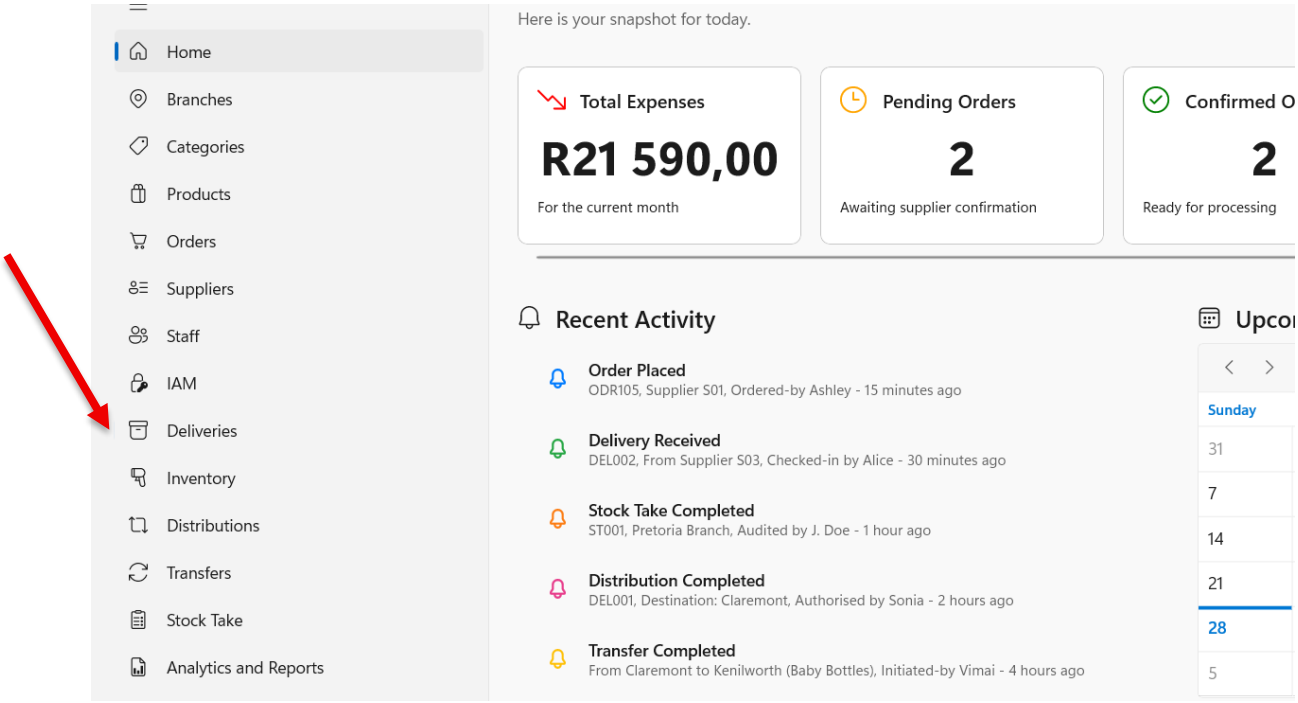

7.5 Download

- Click on **Download CSV** button. When download successful a green info bar with feedback pops up

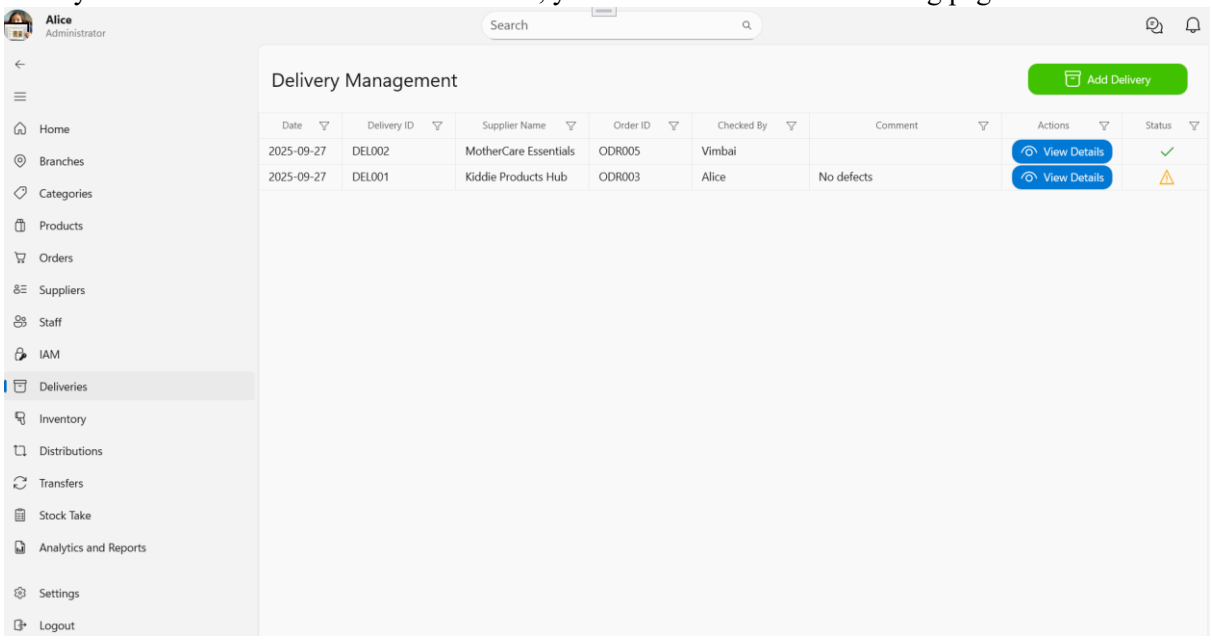

8. Delivery

- Navigate to the Deliveries Page by clicking on the Deliveries icon shown by the red arrow:

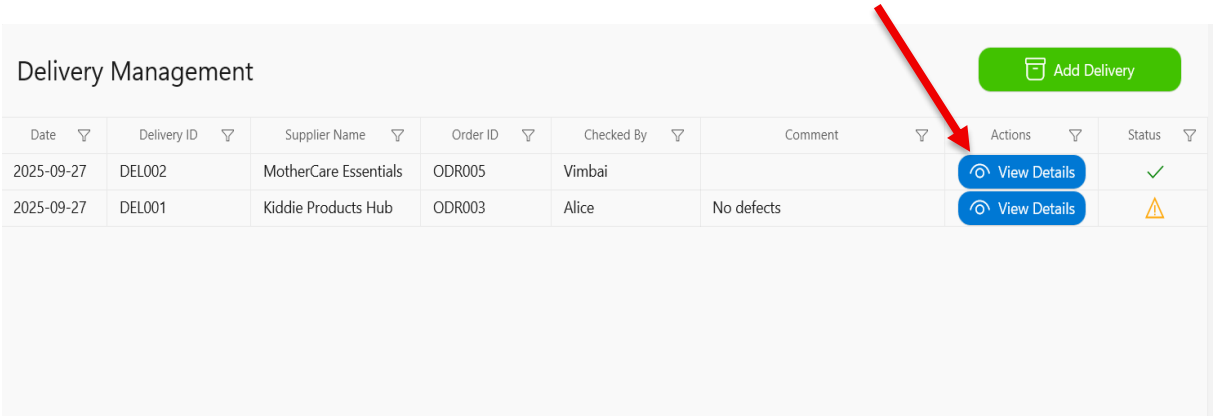

- Once you have clicked on the Deliveries icon, you should land on the following page:

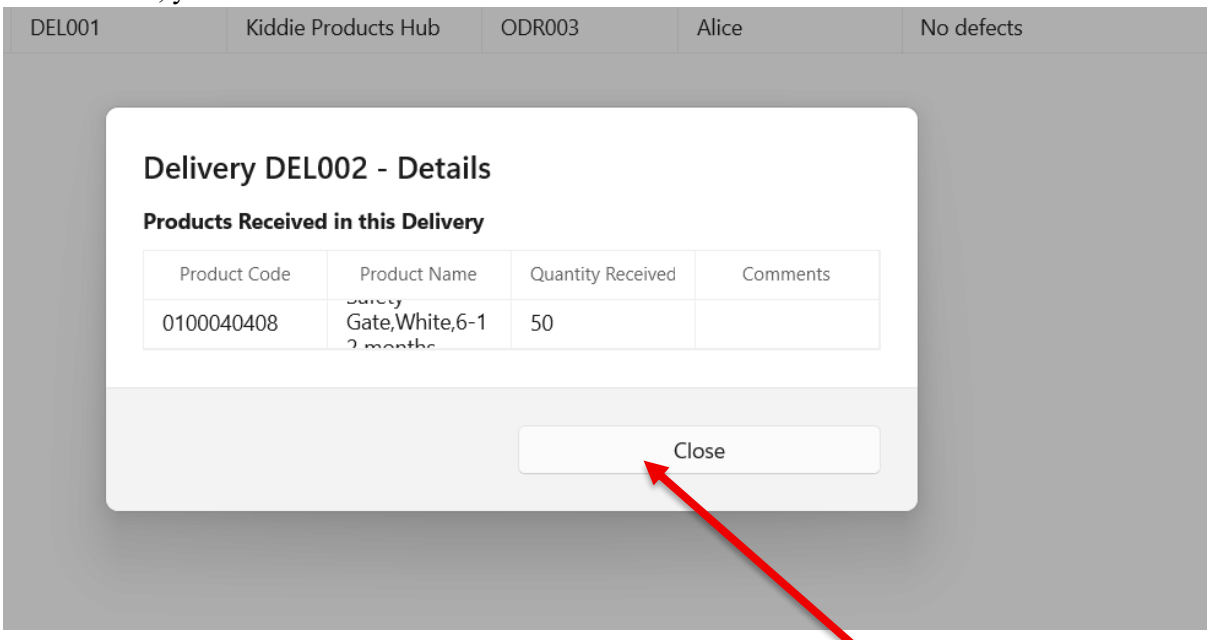

- Here you get a summary of all the deliveries that are currently in the system. The details of each delivery and the status of the delivery.

8.1 View delivery

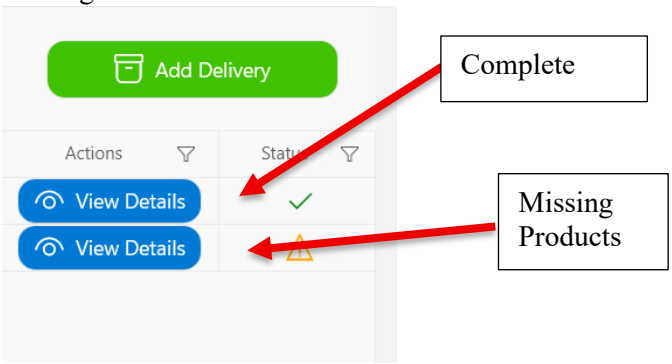

- To view the specific details of a particular delivery click on the view details button.

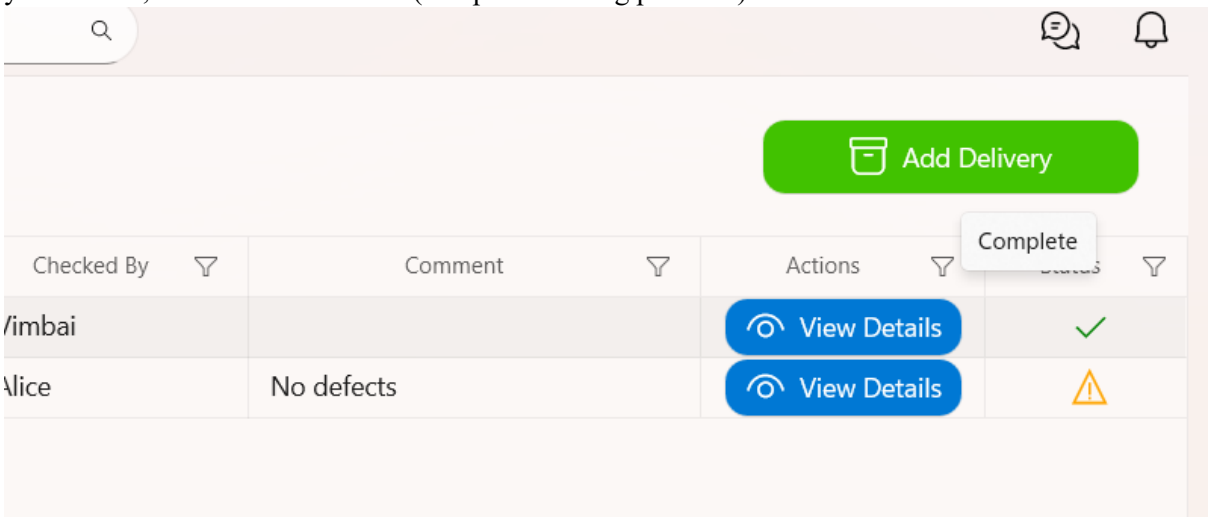

- Once clicked, you should see this:

- Once you have viewed the details, click Close to go back to the main page.
- The two icons on the status column show whether a delivery had the complete order or had some missing items.

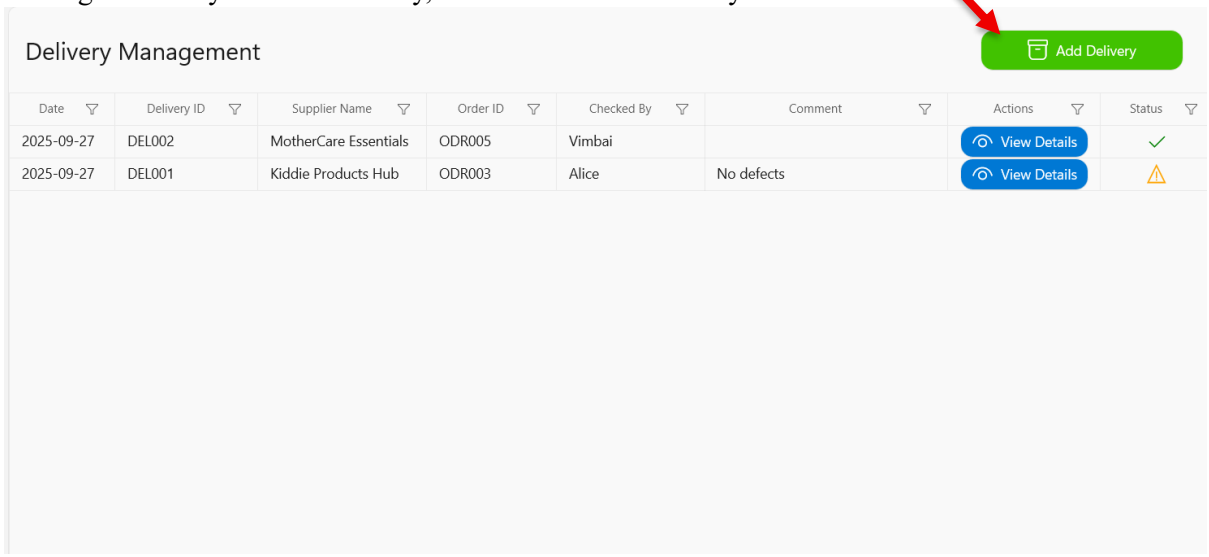

- The icons are simply indicators; if you want to see the missing products from the delivery, then one has to click on the View Details button like before. However, if you hover over them with your mouse, it will show the status(complete/missing products) as well.

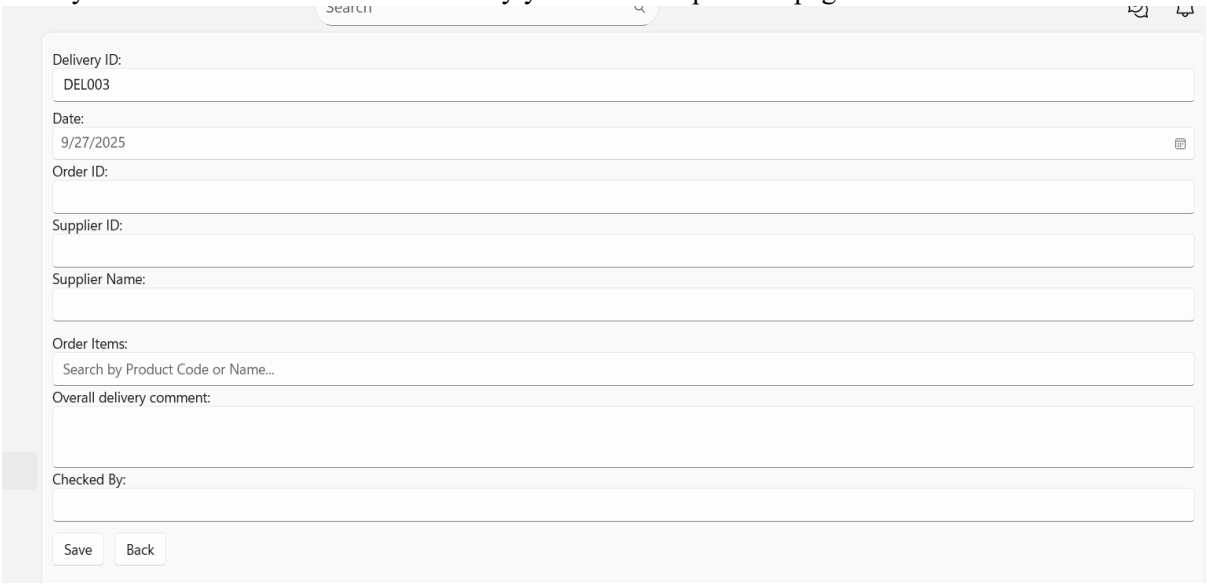

8.2 Add Delivery

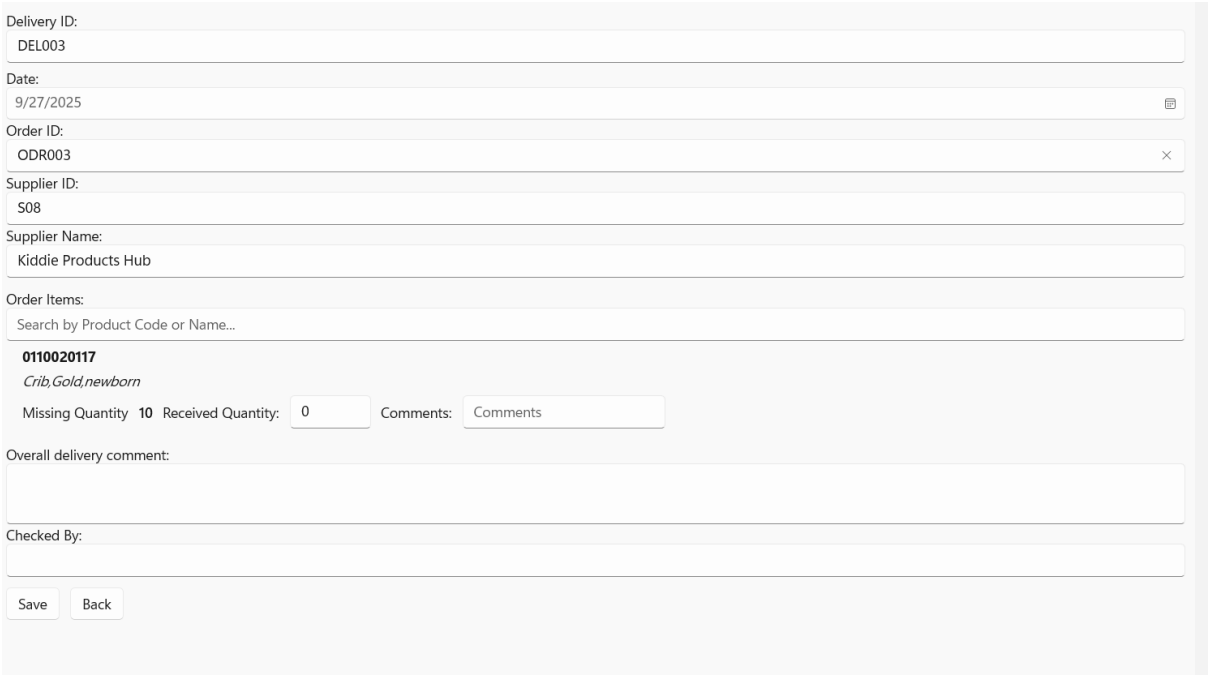

- Adding a DeliveryTo add a delivery, click on the Add Delivery Button

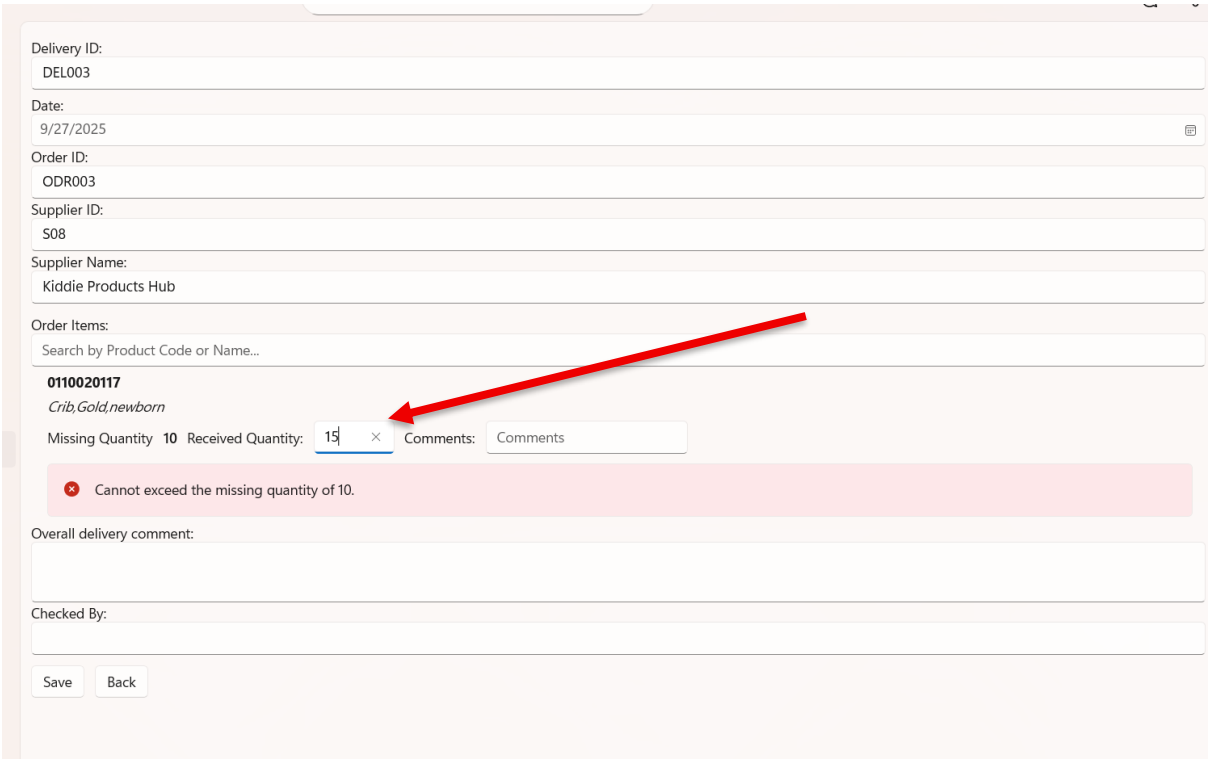

Once you have clicked on the Add Delivery you will end up on the page below:

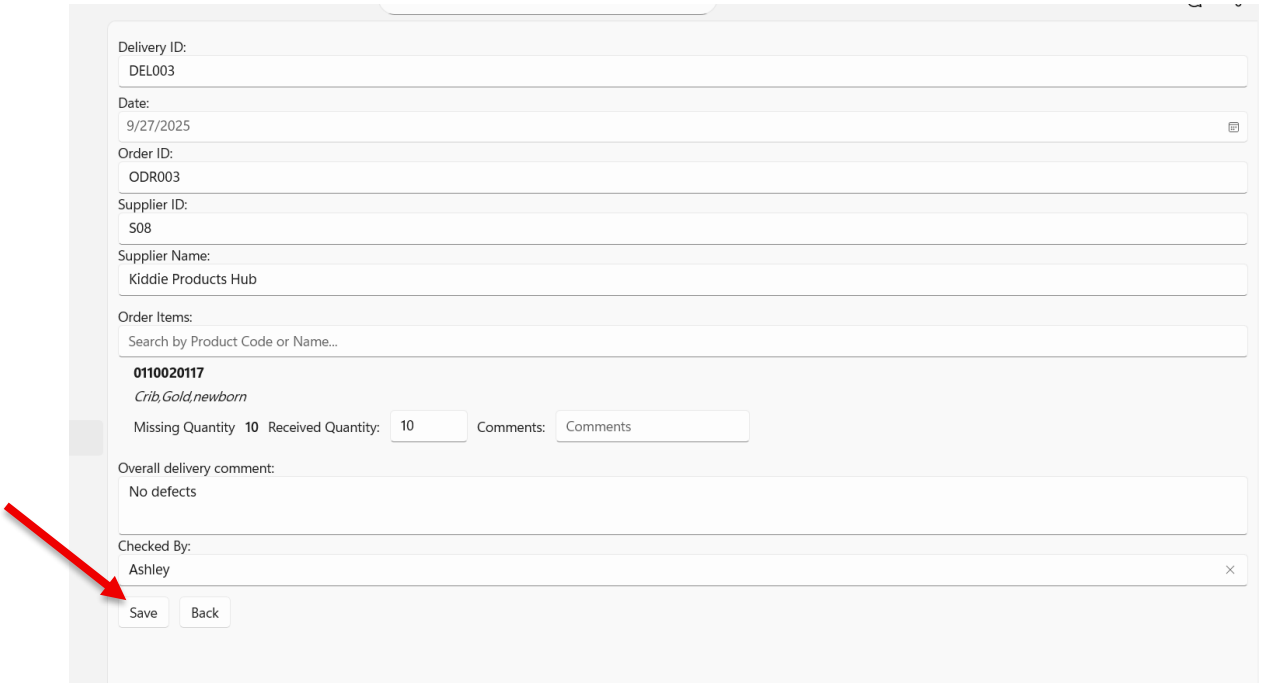

- The Delivery ID and date are automatically filled in for you as these are autogenerated. The Date can be modified by clicking on the calendar icon shown by the arrow.
- The Order ID should be entered in Capital letters, and once done, press Enter. The Supplier ID and Supplier Name will then be automatically filled in with the ones that correspond to that specific ID. A list of the expected order items will then be shown as well. The page will look like this when the Order ID is entered:

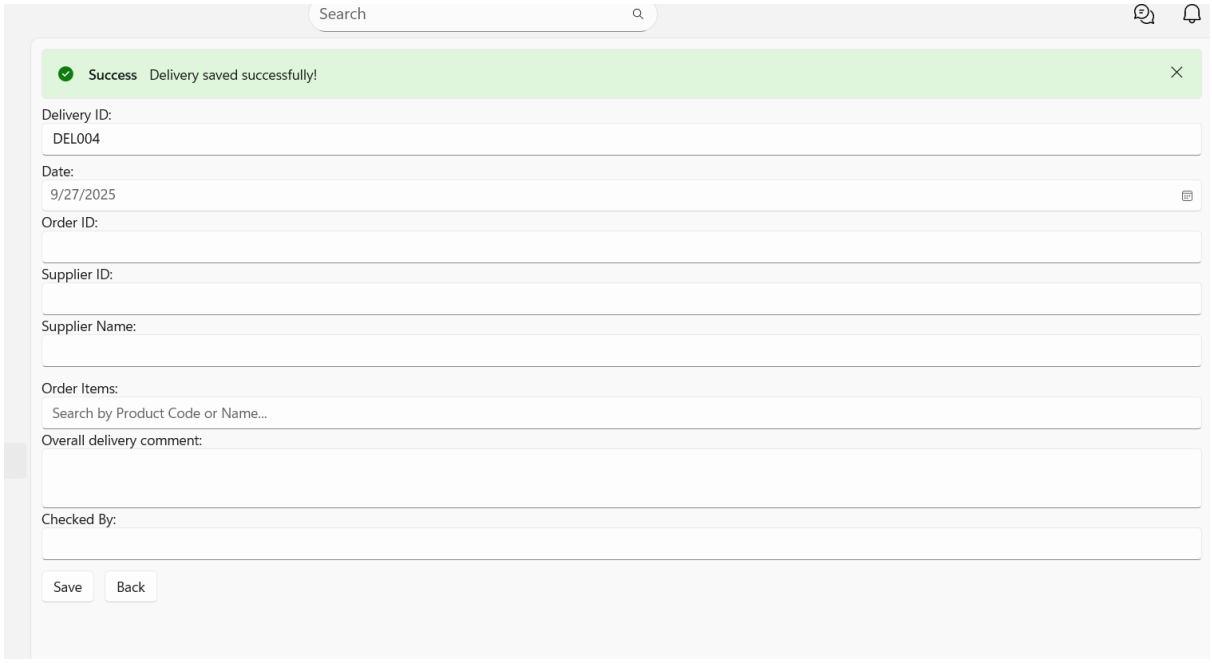

- If you enter a received quantity that is greater than the missing quantity or required quantity, an error should pop up like this on the screen:

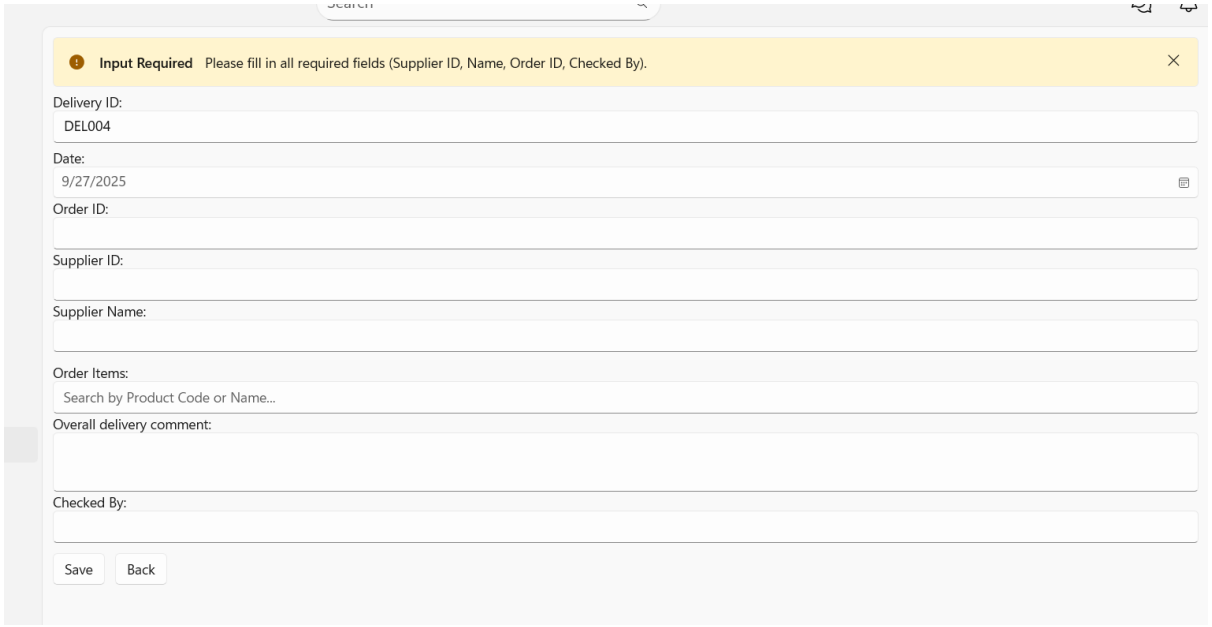

- Once a quantity entered is equal to or less than the missing quantity/required quantity, depending on whether the delivery is the first for an order or a second delivery that is covering missing products from the initial delivery, the error will disappear
- Once you have entered the required input. Click on the save button

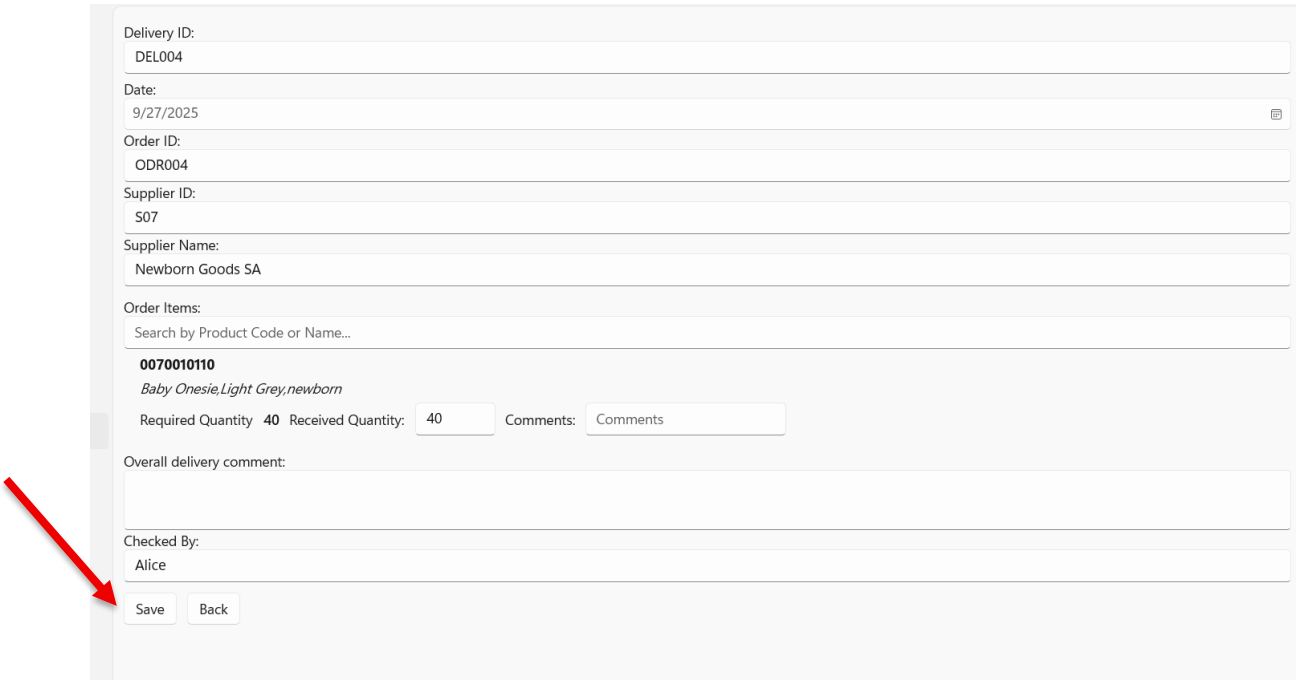

- Once clicked, if the input is all that's required a pop should pop that confirms that the delivery has been saved and the form resets with a new Delivery ID.

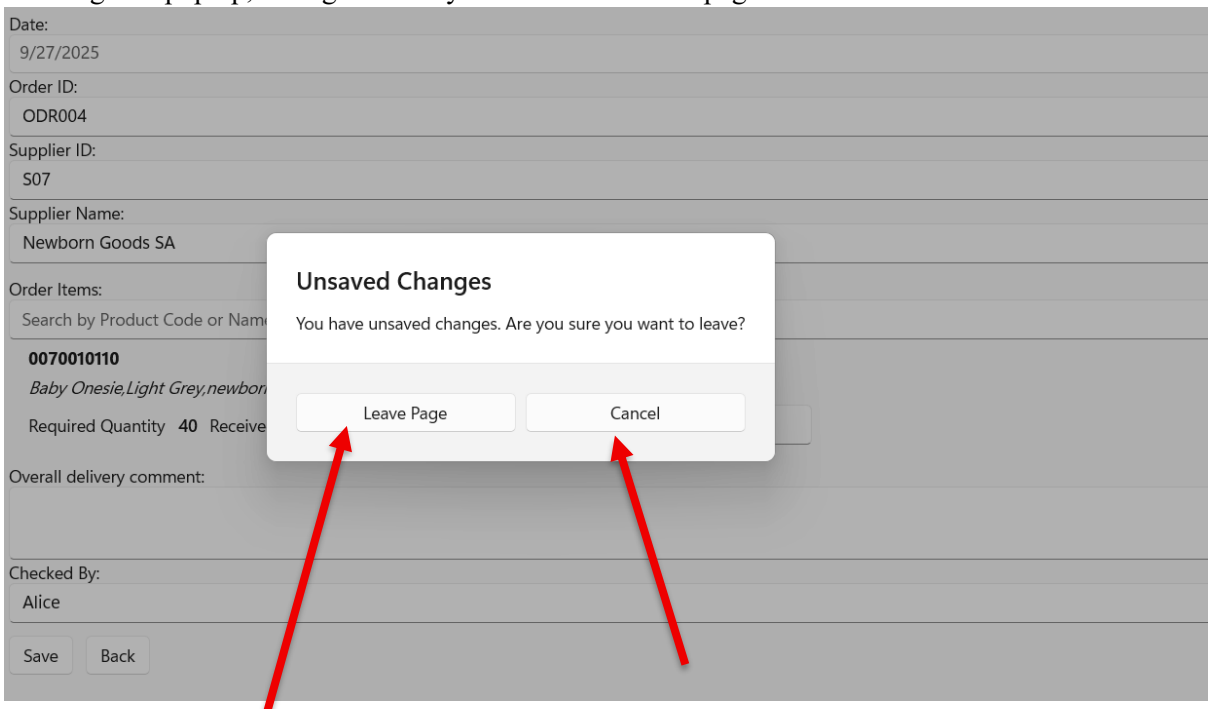

- If you try to save a delivery when the other fields are empty as shown above, the following error will pop up:

- If there are any changes to the file and you click the back button

- A dialog will pop up, asking whether you want to leave the page or cancel. As shown below:

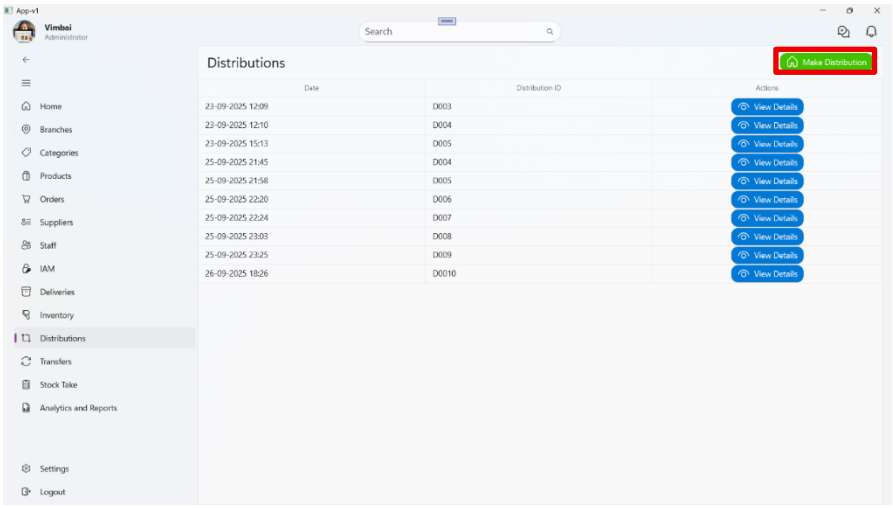

- If you click the Leave Page button, it will take you to the main page of the delivery management. If you click the Cancel then it will allow you to continue editing or save the changes that you have made.

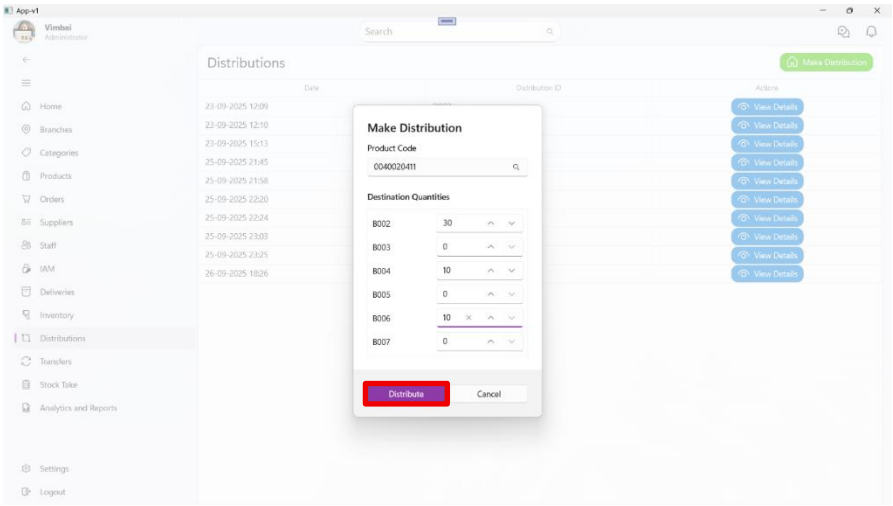

9. Distributions

9.1 Make a distribution

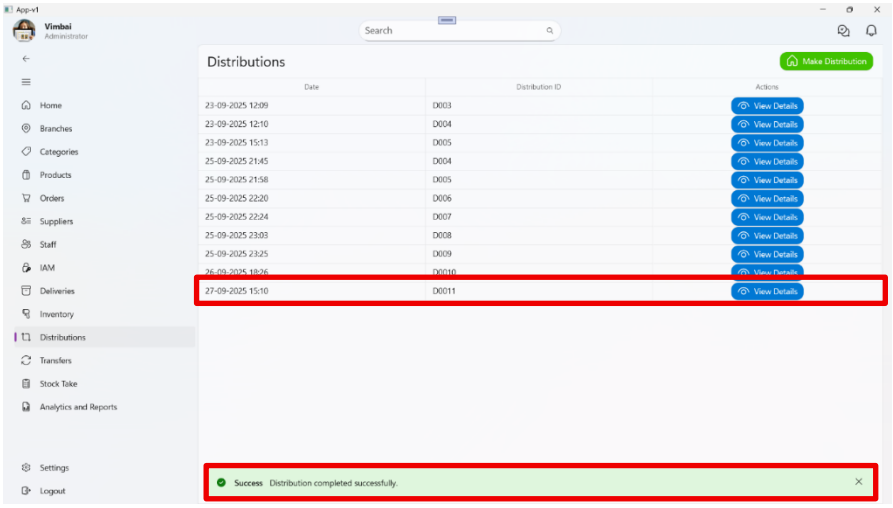

- Click the green “Make Distribution”

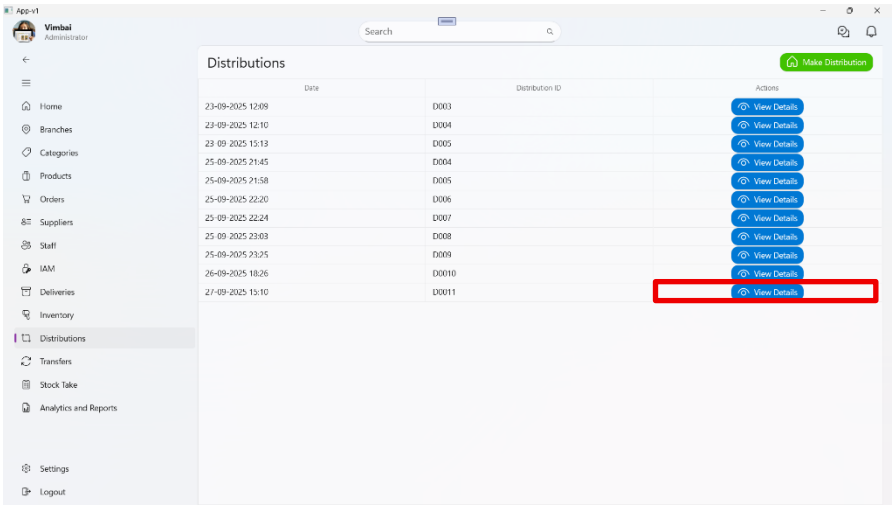

- Enter valid input for the distribution and click the purple “Distribute” button

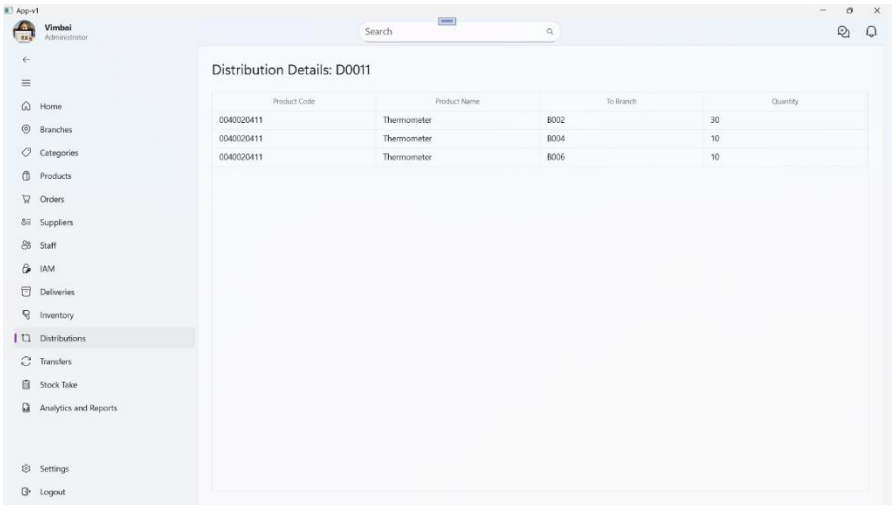

- A message will appear at the bottom of the page and the new distribution would appear in the Distribute data grid

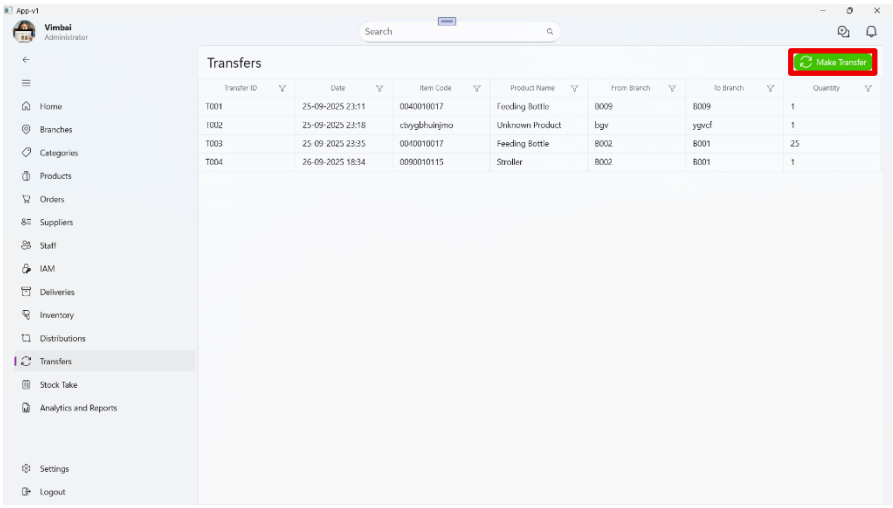

- To view distribution details click the “View Details” button and the details will appear like this

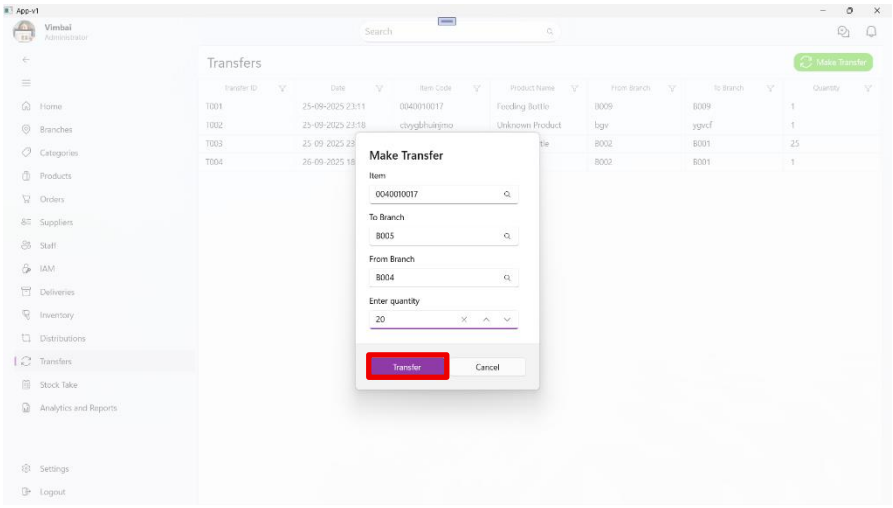

9.2 Make a transfer

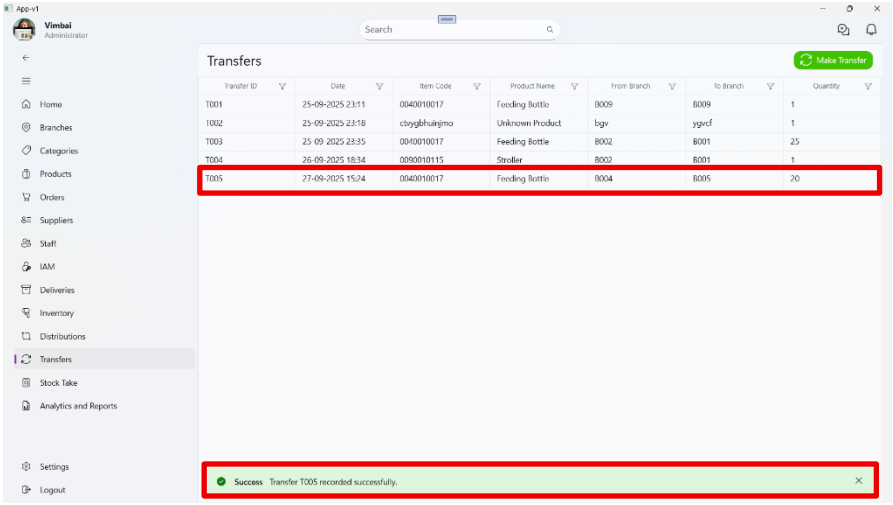

- Click the green “Make Transfer” button

- Enter valid input to make the transfer and click the purple “Transfer” button

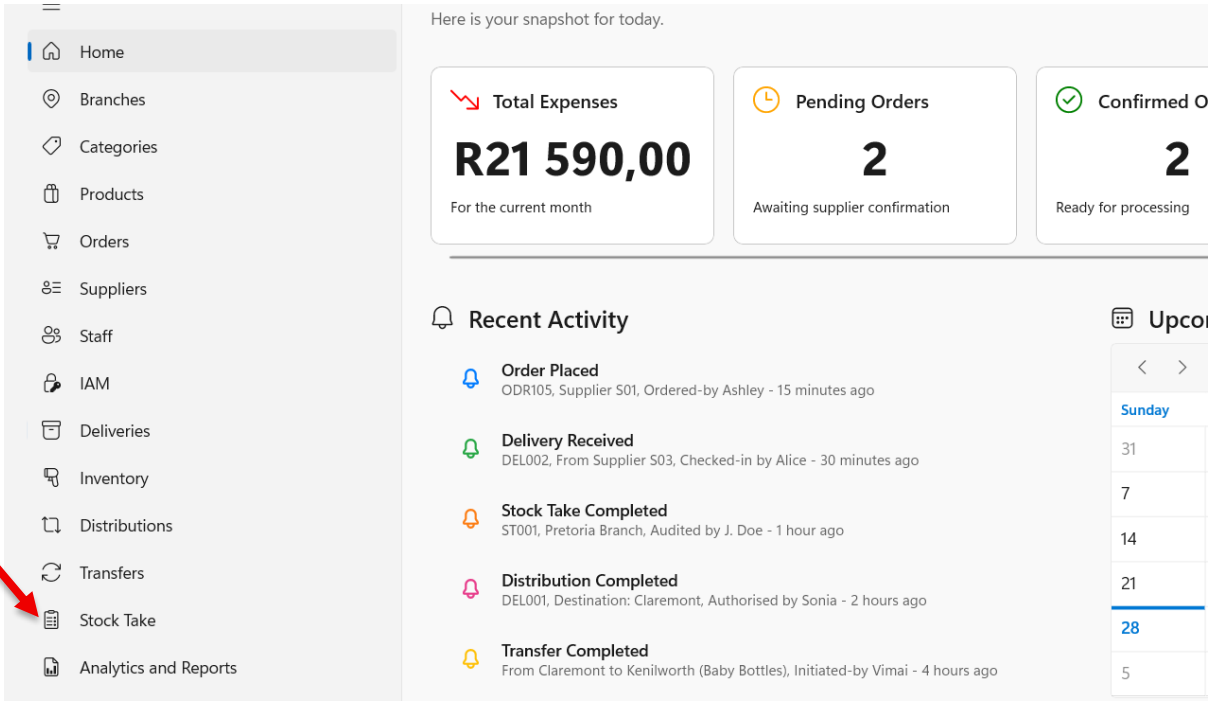

- A message will appear at the bottom of the page and the new transfer would appear in the Transfers data grid

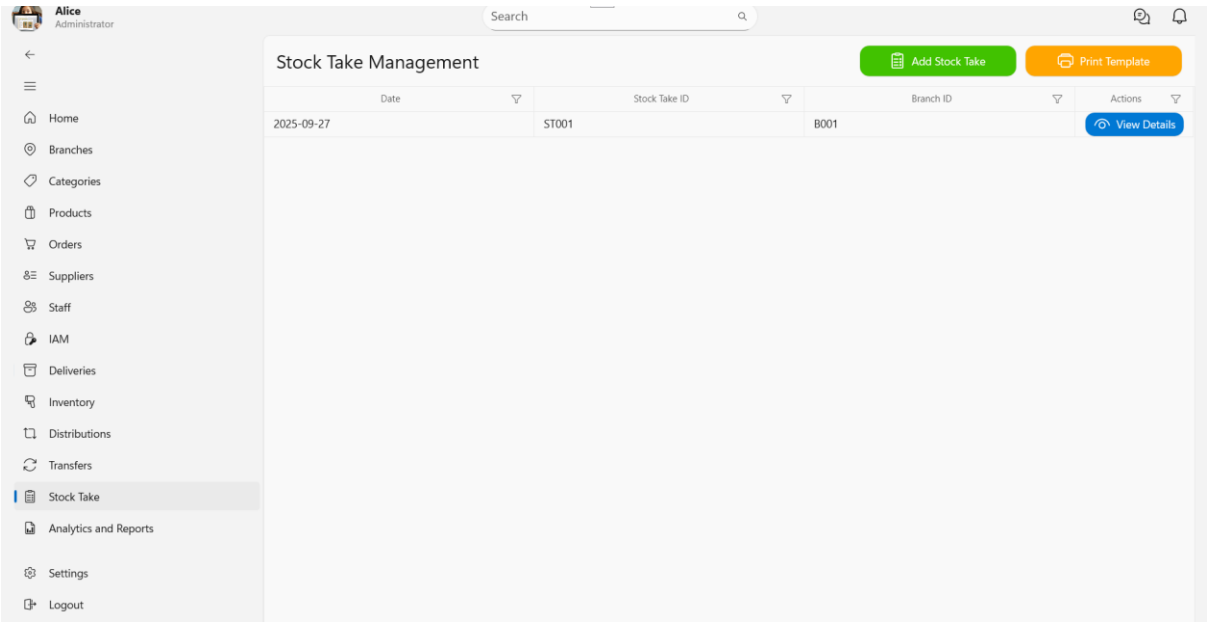

10. Stock Take

- Navigate to the Stock Take page by clicking on the Stock Take Icon shown by the red arrow:

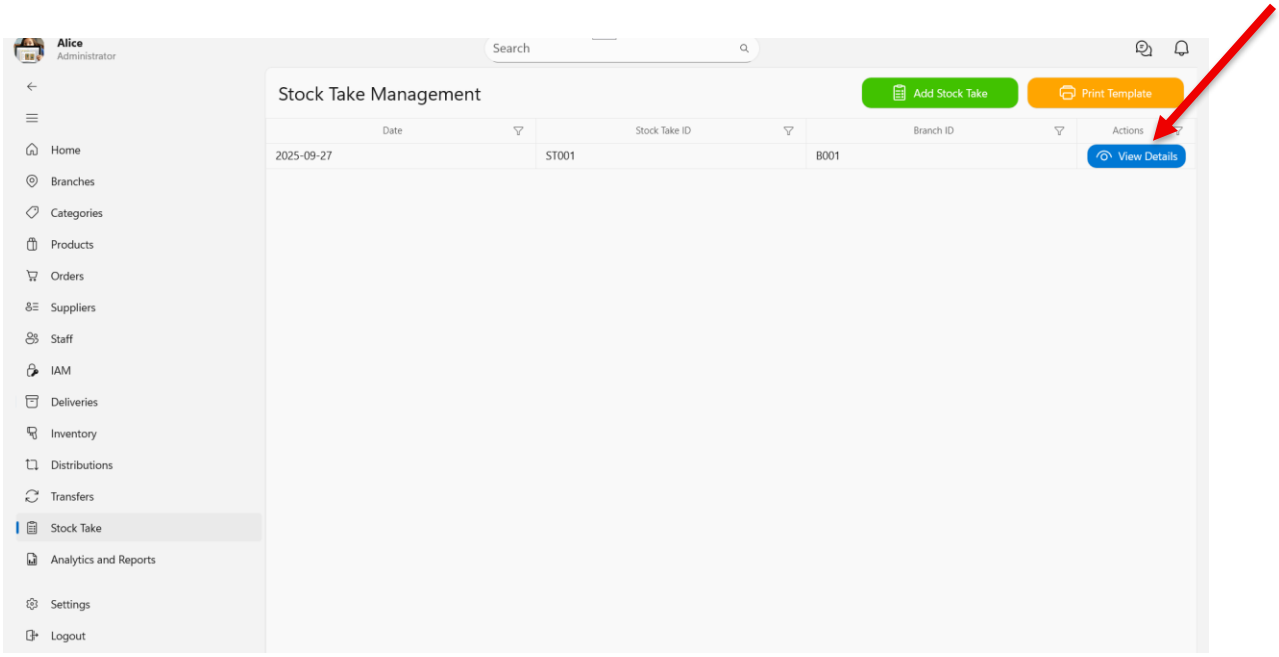

- Once the icon is clicked, you will land on this page:

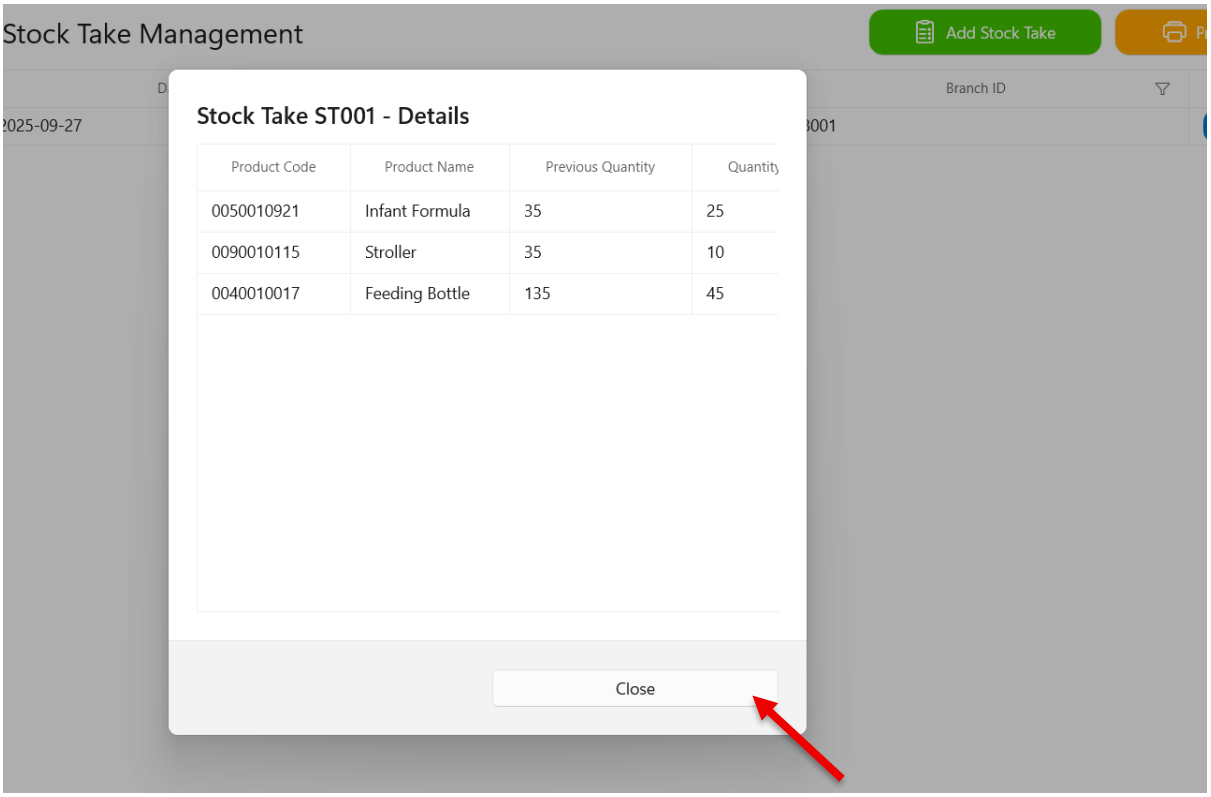

- This is the main page for Stock Take Management, which displays all stock takes that have occurred at the various branches. It will show how many stock takes have been done and the details of each stock.

10.1 View stock take details

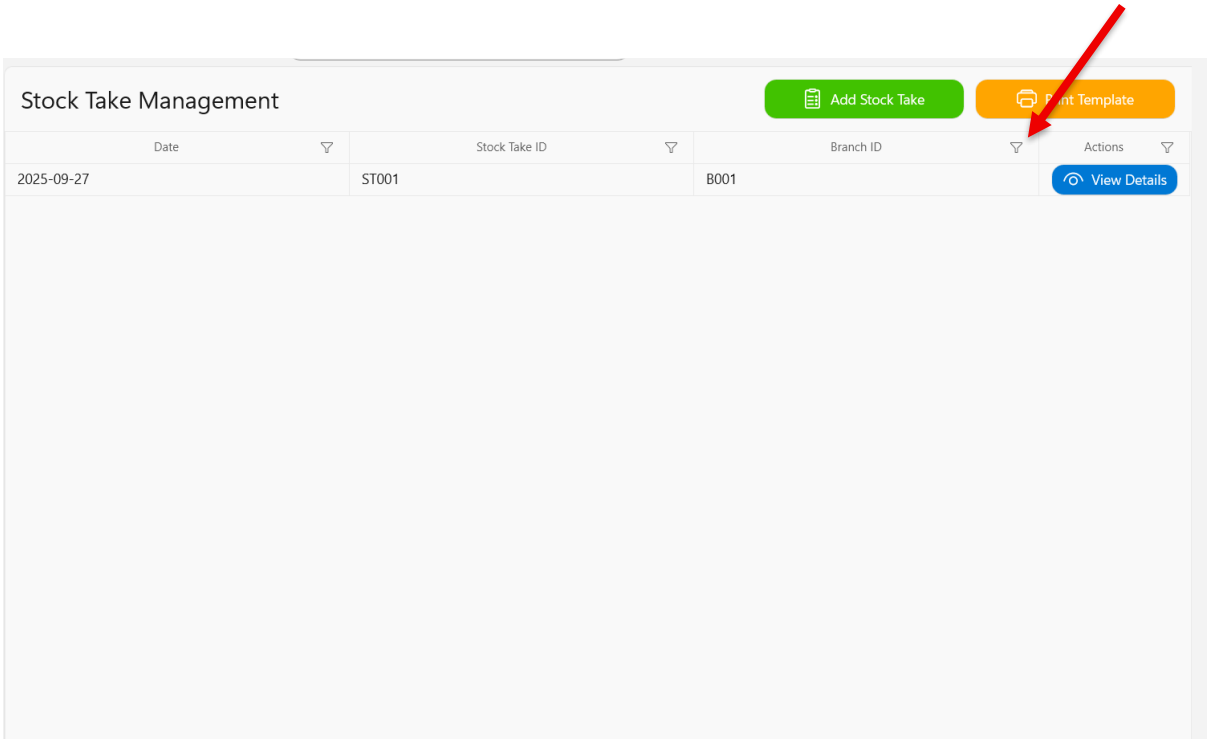

- To view the details of a particular stock take at a particular branch. Click on the View Details button on the branch that you are interested in.

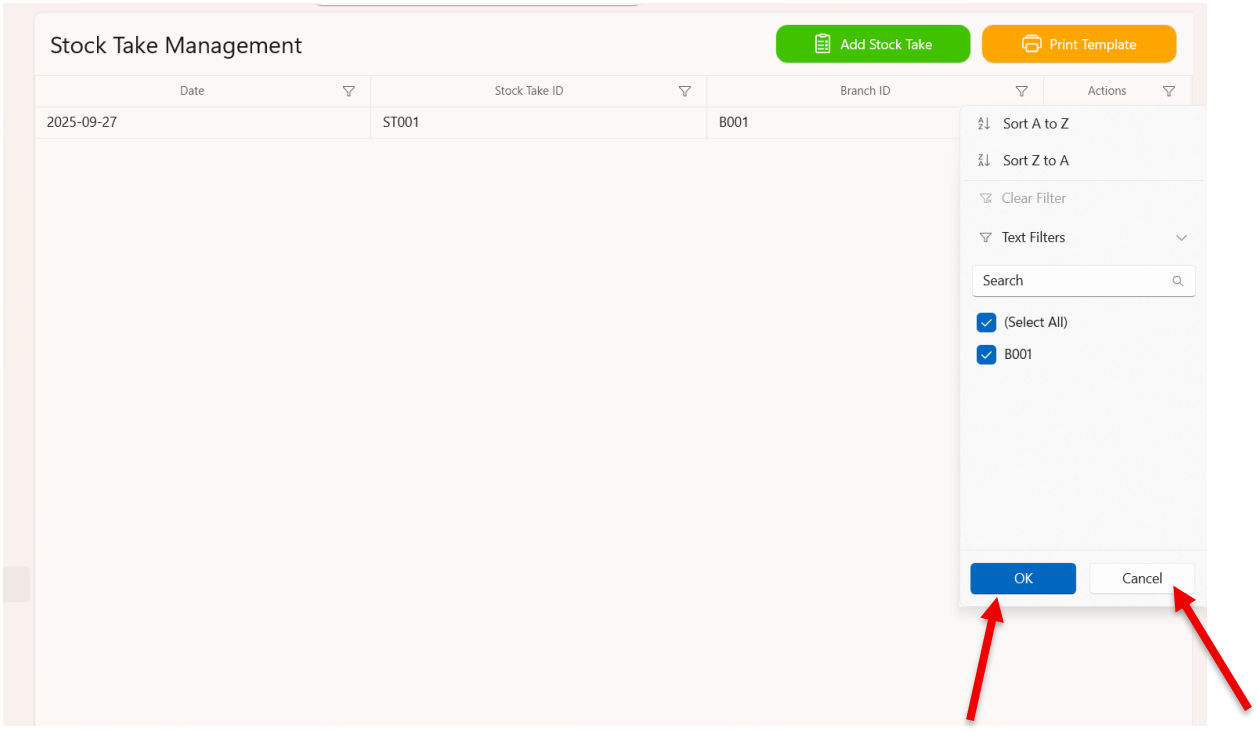

- Once clicked the following will pop up:

- Here you can view the details of the particular stock take that occurred and which products were counted. Once done, click the Close button to go back to the main page.
- To filter the stock page for a particular branch, click the filter next to the branch ID

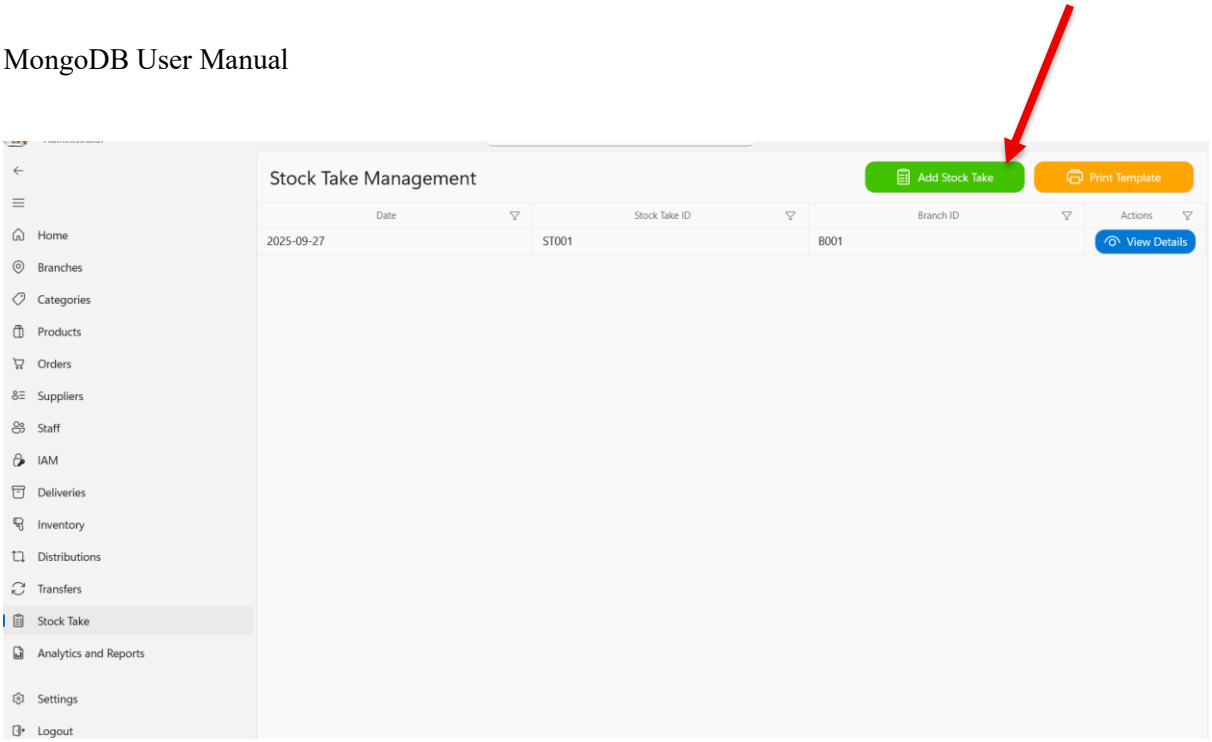

- Once clicked, the following page will pop up, you can either search the branch ID that you want or deselect and select the specific branch:

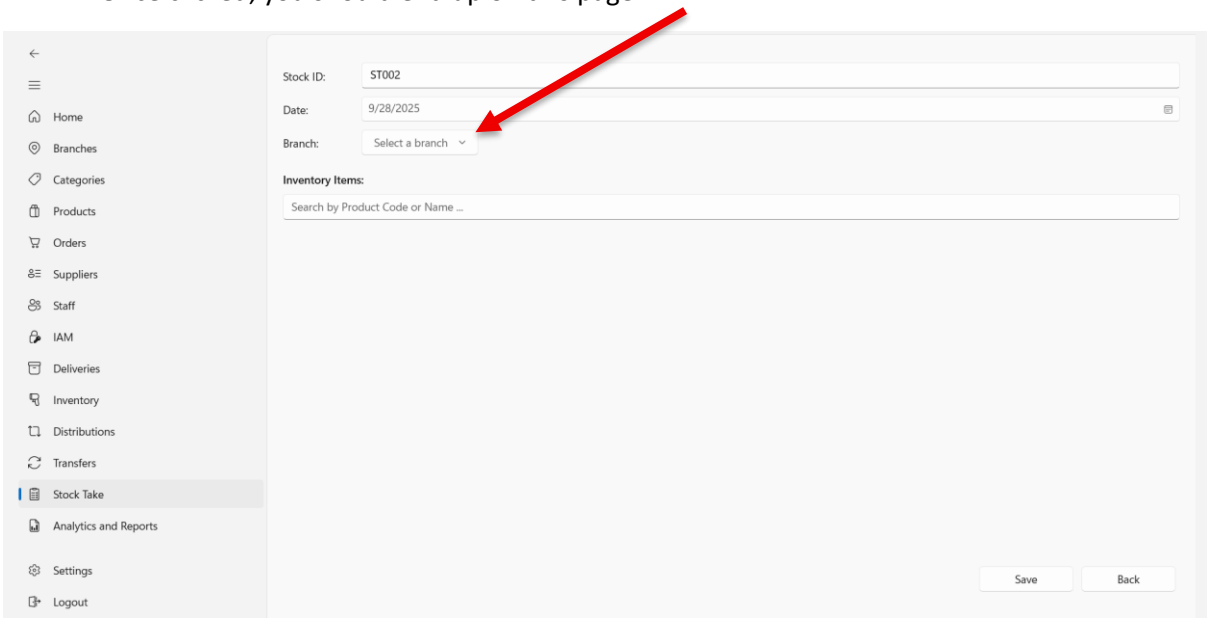

- Once done, either click OK to filter the page to the specific branch or Cancel to remove the changes that you had made.

10.2 Adding a Stock Take

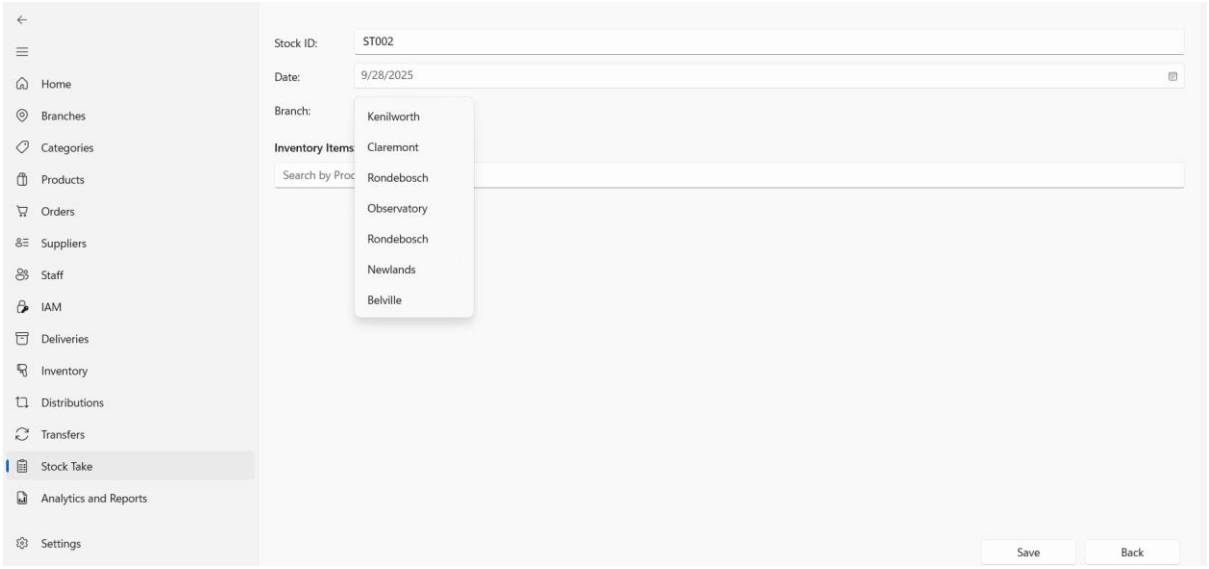

- To add a stock take for a particular branch, click the add delivery button

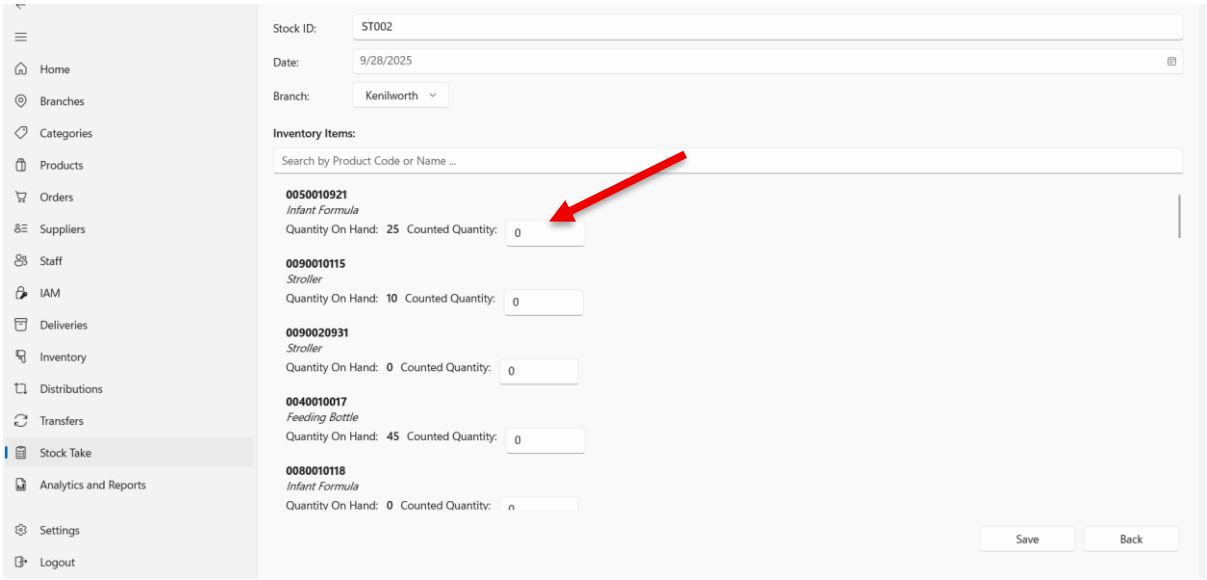

- Once clicked, you should end up on this page:

- The stock ID will be automatically generated, so it will be filled in and can not be removed. The date is also automatically filled in; however, this can be modified to fit an earlier date. Select a branch by clicking on the arrow pointing down and it will show a list of the branches, select the one that you want to take stock take for. The page will change to the following when the upside arrow shown by the red arrow above is clicked.

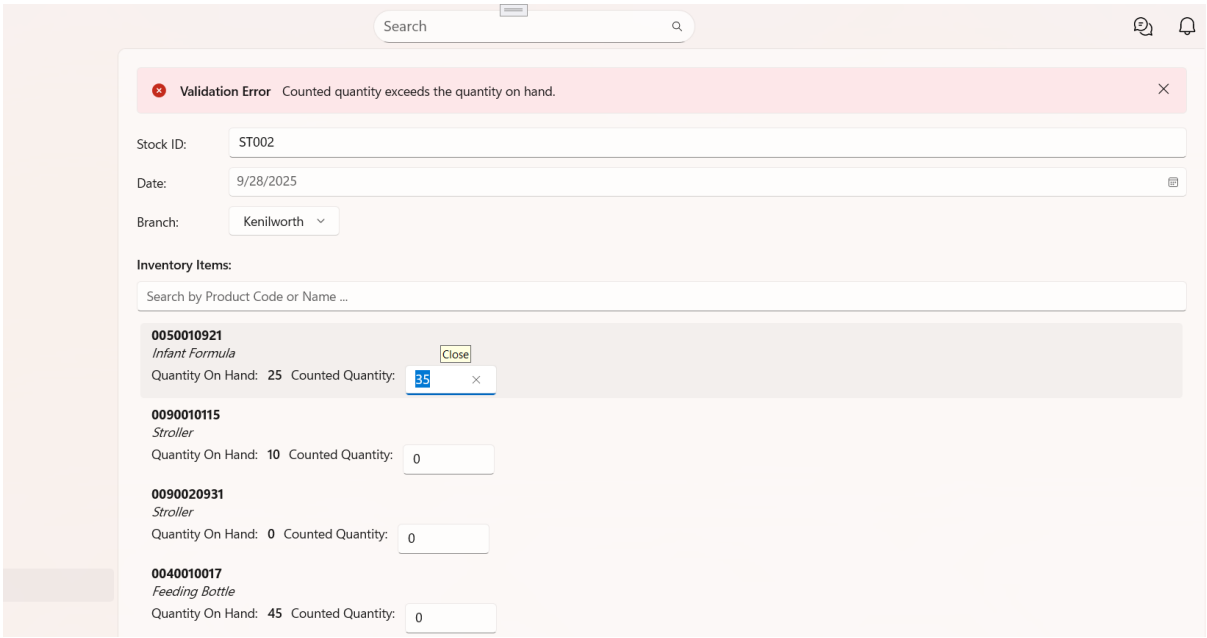

- Once a branch is selected, it will show a list of inventory items that are in a particular branch

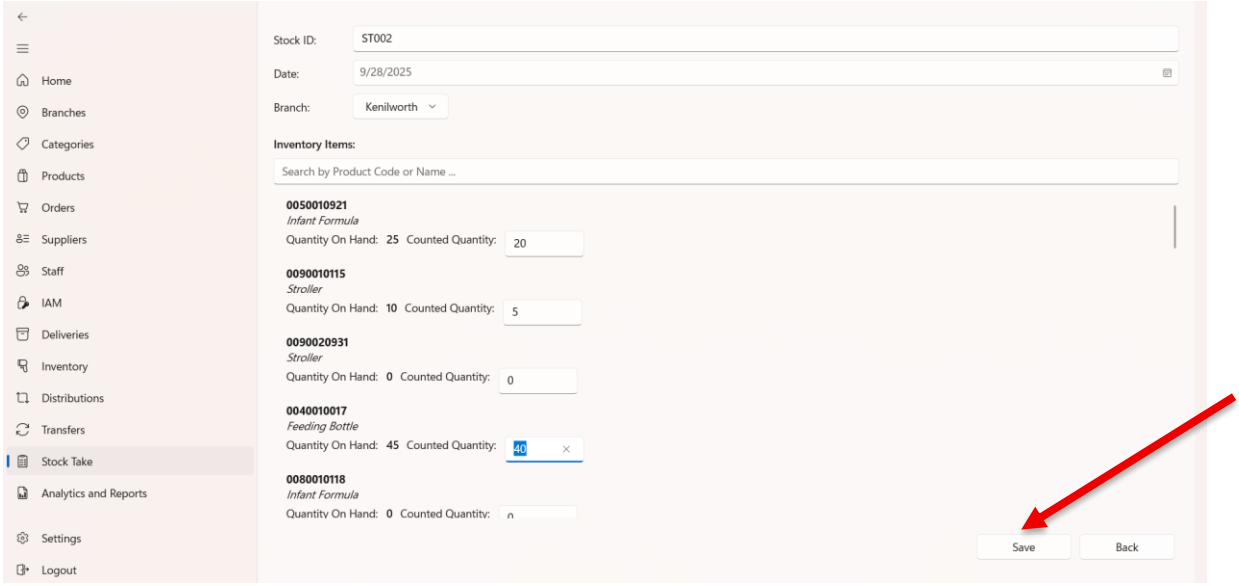

- You can either search for an inventory item by using the search bar or scroll through the list to find the specific item that you want to adjust in quantity. To adjust the quantity, click on the counted quantity box and enter the desired quantity.

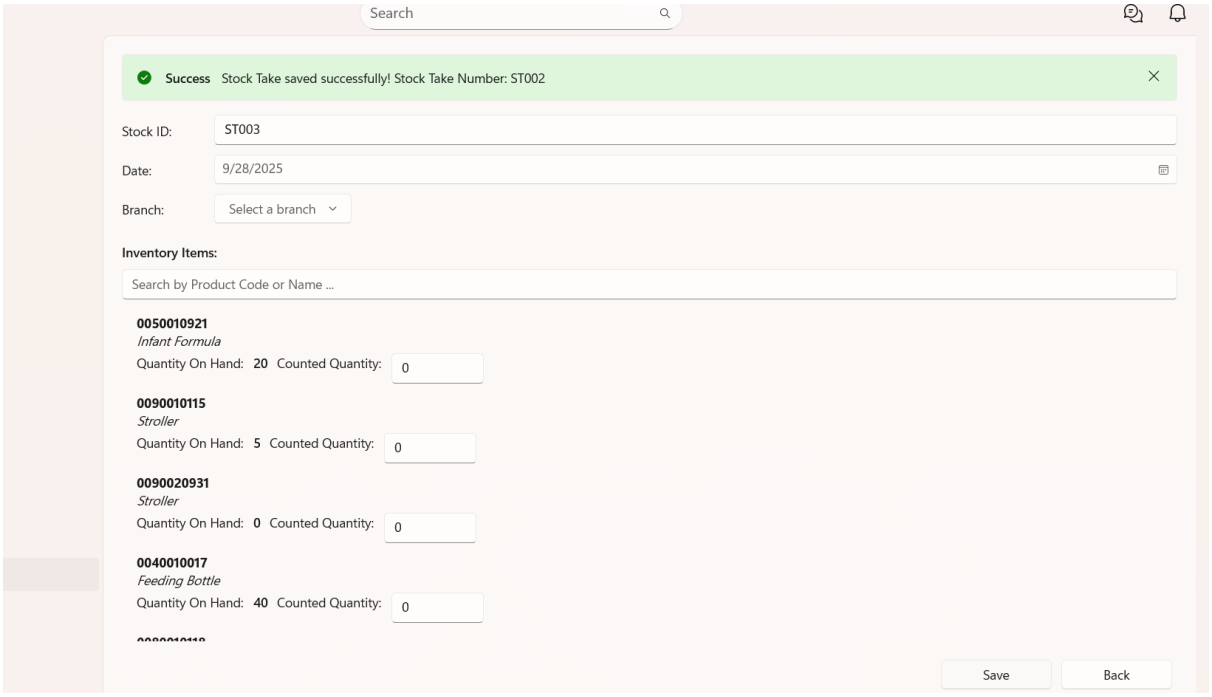

- If you enter a quantity greater than the quantity on hand, an error will pop up

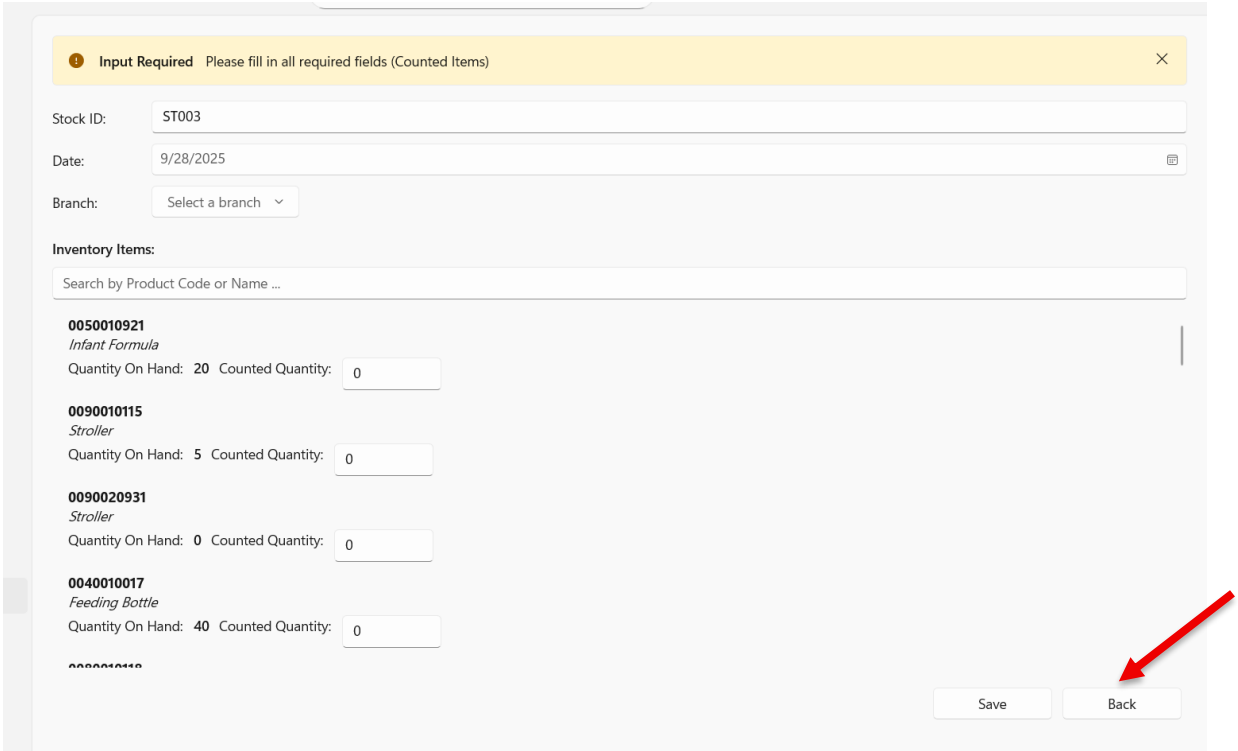

- Th error will only leave once, the quantity entered is below the quantity on hand.
- Once you have entered all the quantities that are changing, click on the Save button to save the Stock Take

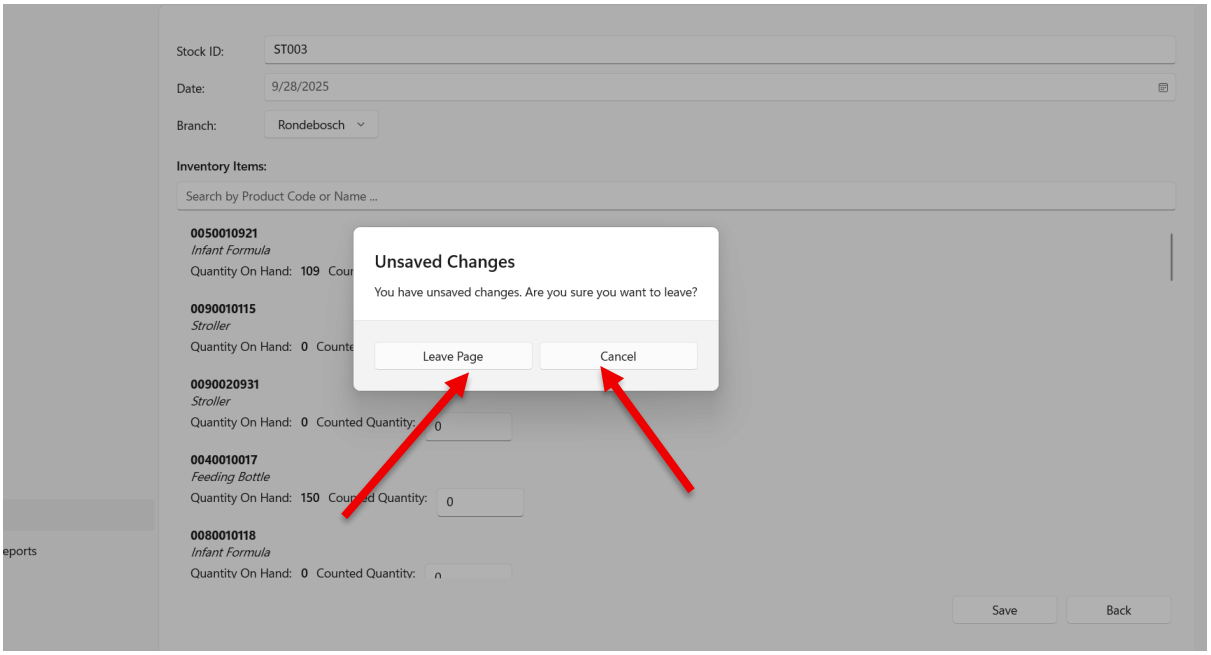

- Once clicked, a status will pop up that lets you know that you have successfully saved a stock take. The form also resets to allow you to enter a new stock take if need be.

- If you try to save a stock take when some fields are missing, the following will show:

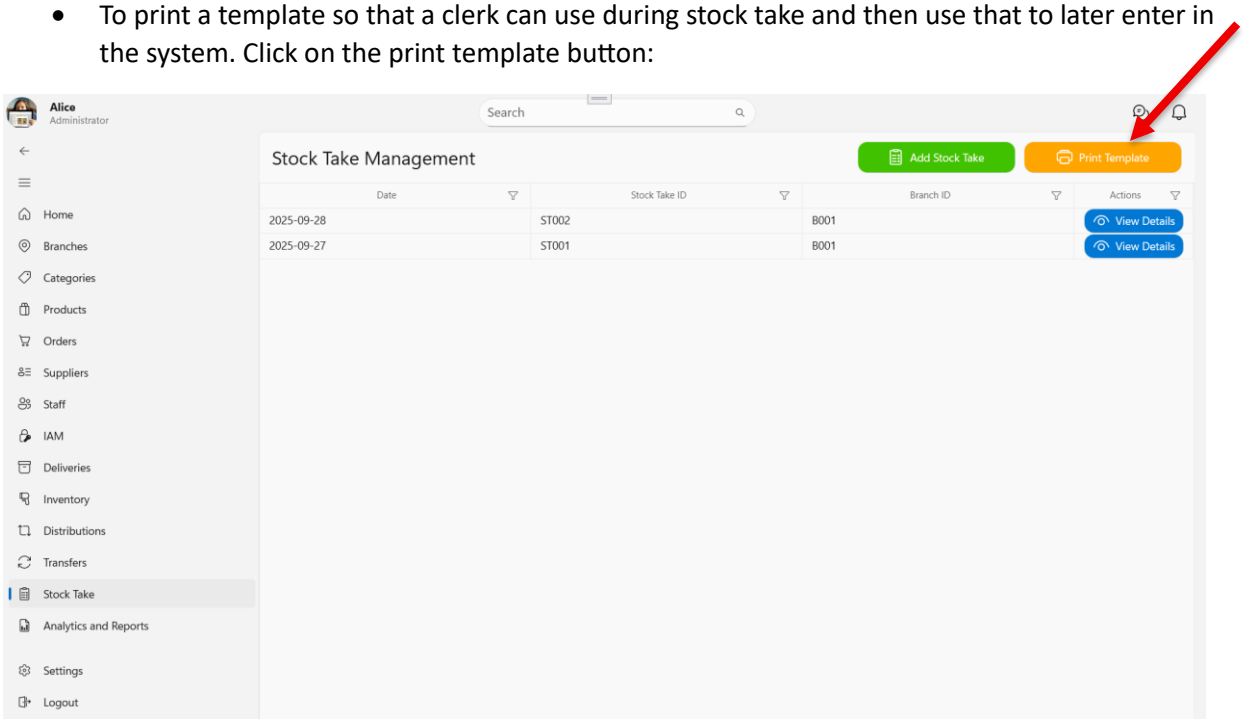

- To get rid of the error, make sure you enter all the required inputs and save or simply click the Back button to leave the page
- Once the back button is clicked and there are unsaved changes , it will ask whether you are sure you want to leave or want to continue editing the page

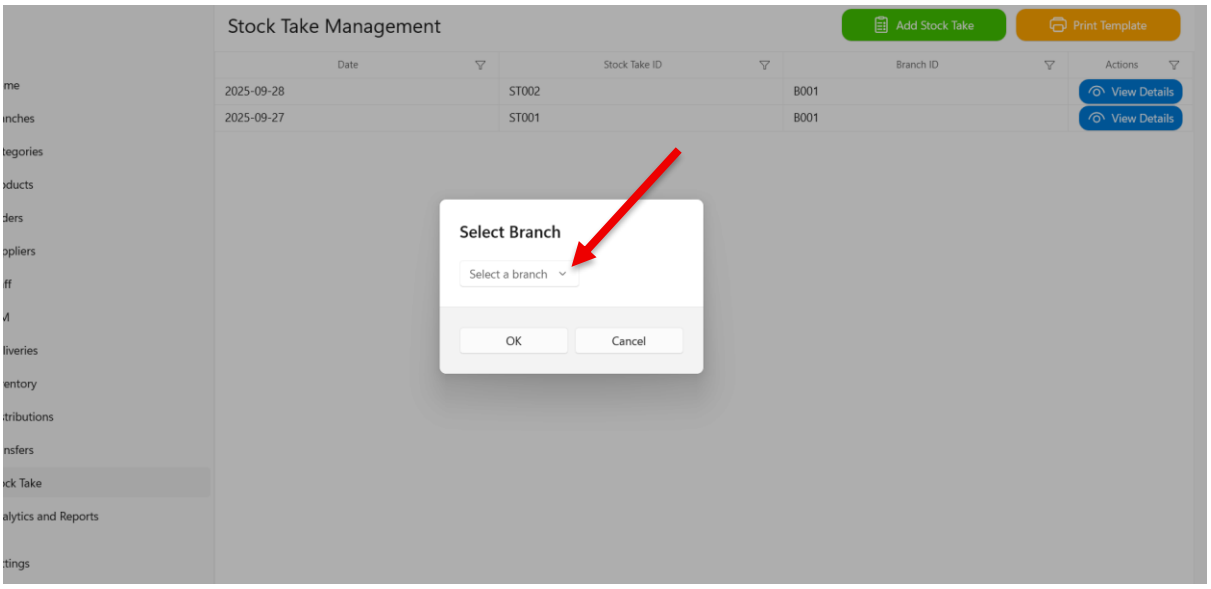

- To leave the page, simply click on the Leave Page, and if you want to continue editing, click on the Cancel button.

10.3 Printing a template

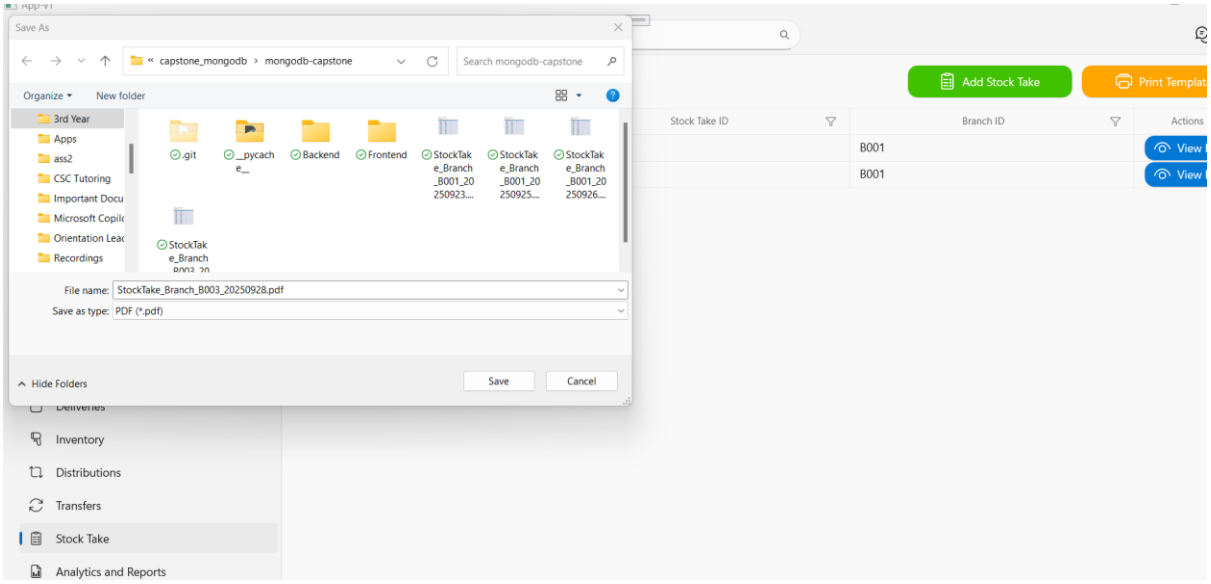

- To print a template so that a clerk can use during stock take and then use that to later enter in the system. Click on the print template button:

- Once clicked, it will prompt you to select a branch. Click the drop down arrow to select the branch that you desire to take a stock take for.

- Once a branch is selected, click OK

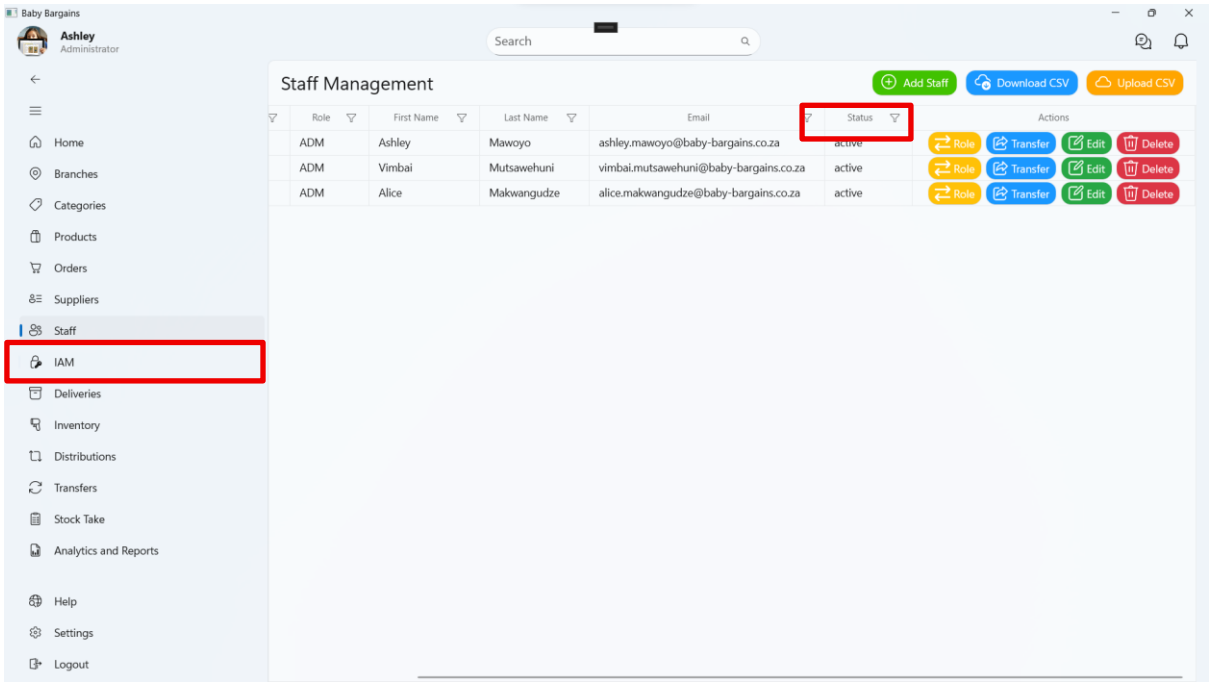

- It will then generate a PDF and ask you to save the file in the folder that you want. Once that is done, simply click on save and the file will be saved. To then print the file, navigate to where the file is located on your computer and print the file.

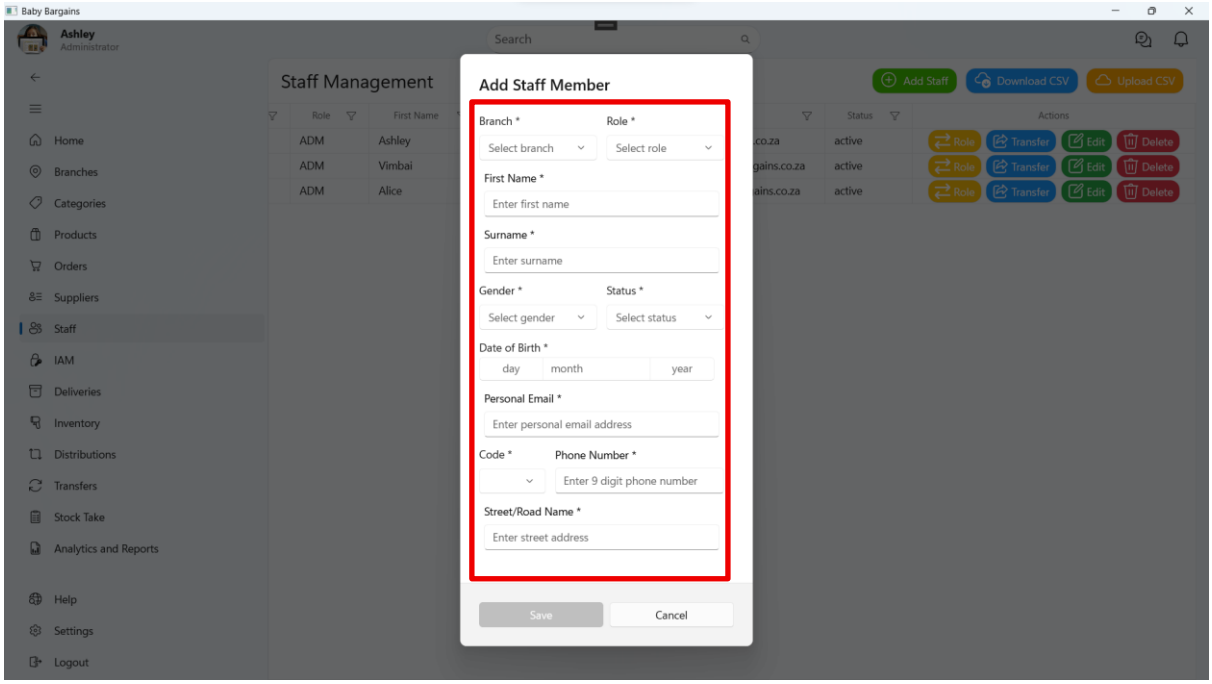

11. Staff

11.1 Add staff

- Navigate to staff tab and click on **Add Staff** button

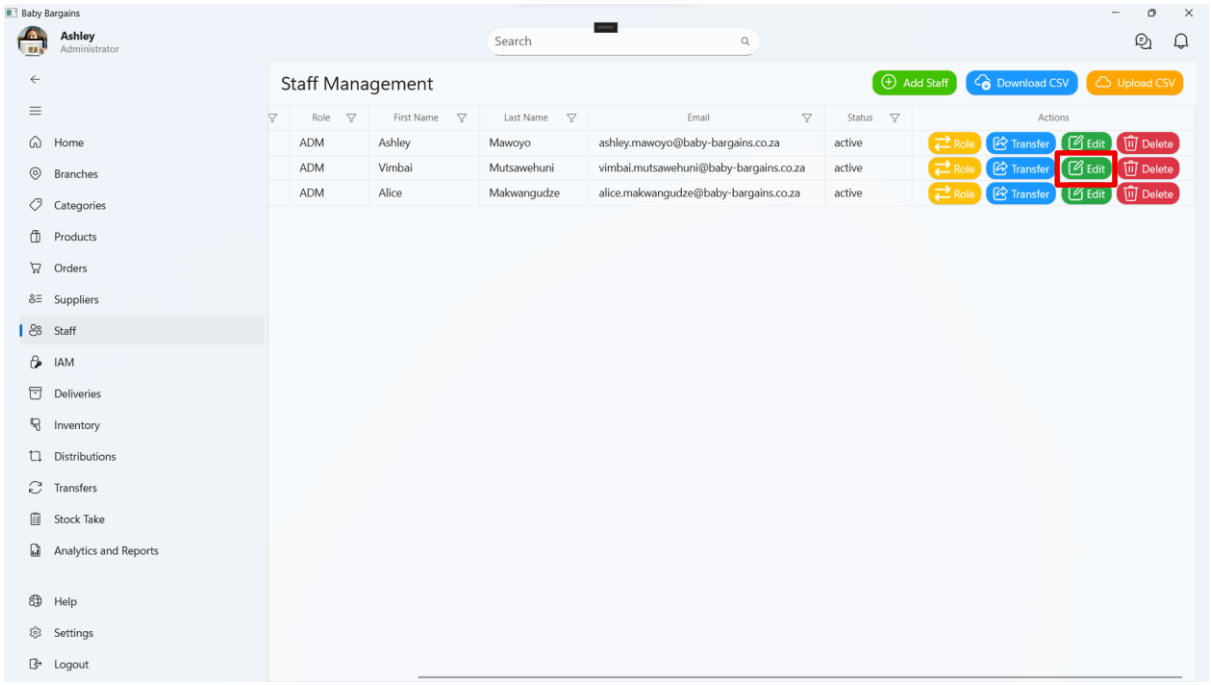

- A form will pop up and be asked to fill in the details required

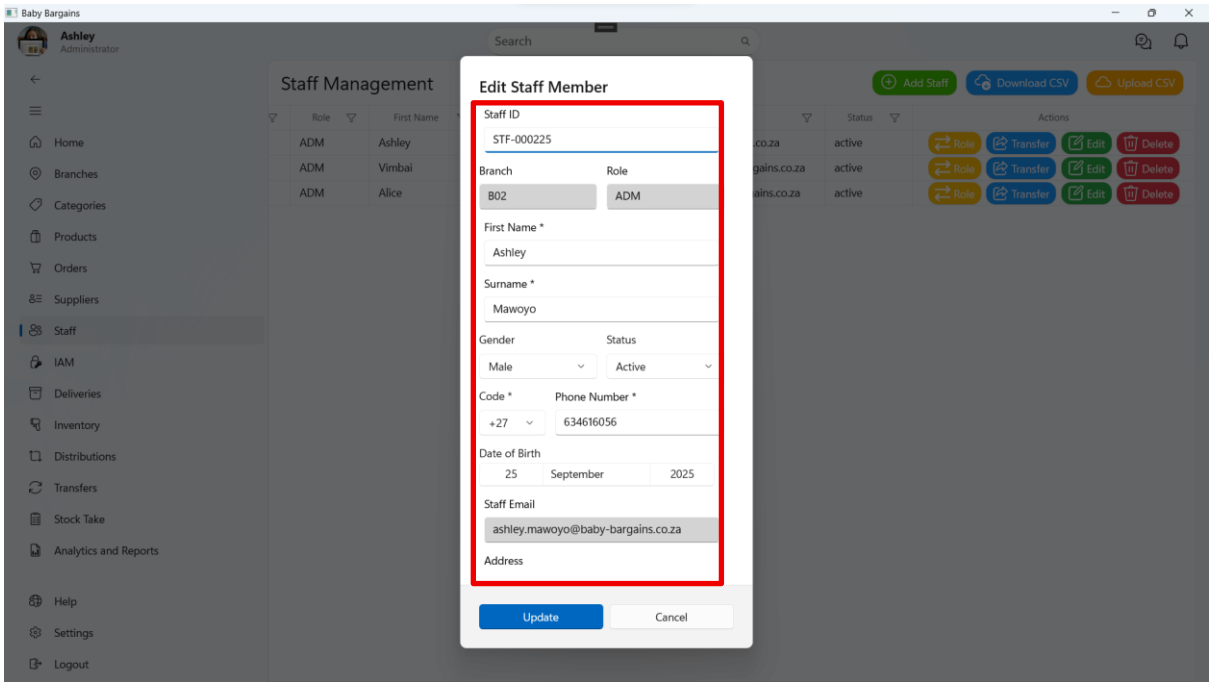

- An info bar will pop up if save success same for when an error occurs.

11.2 Edit staff

- Click on **Edit** button

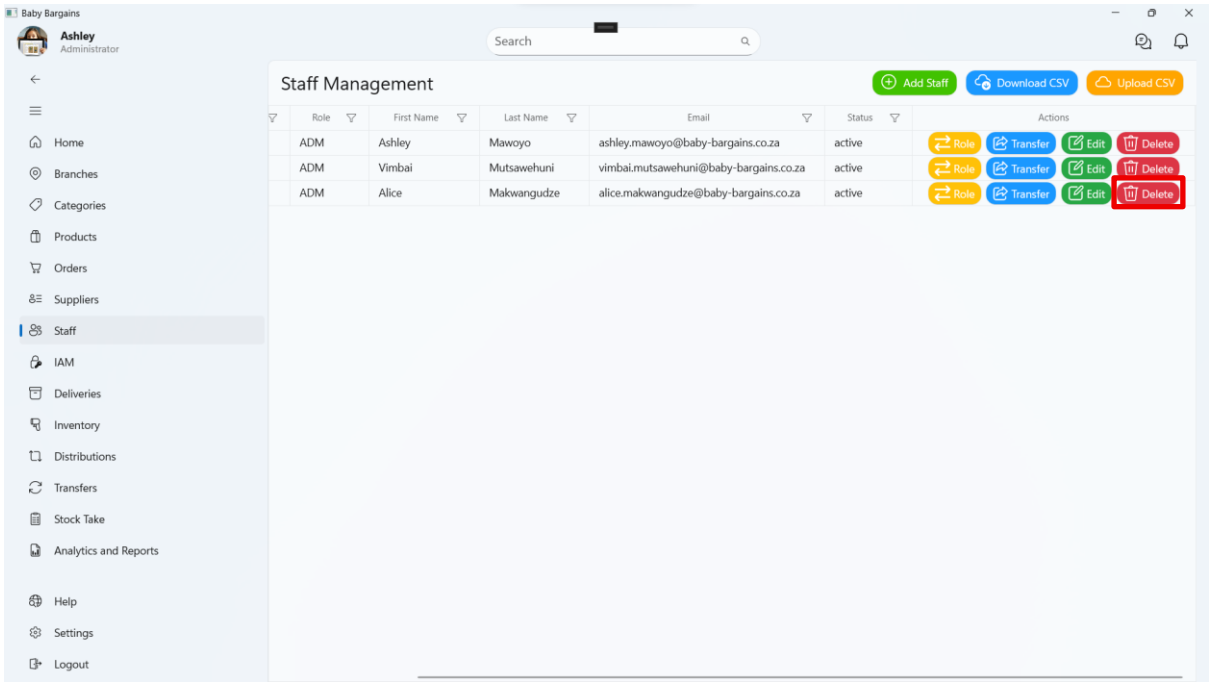

- A prefilled form will pop up then make necessary changes and save
- Non-editable fields are colour in grey

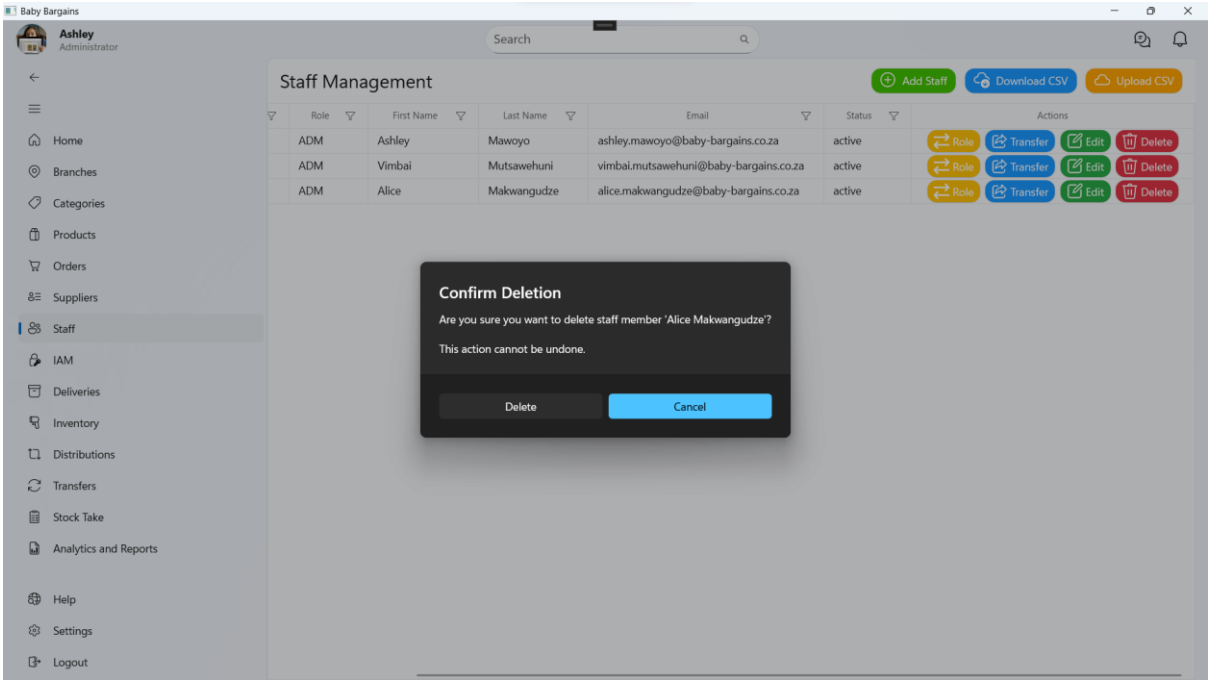

11.3 Delete staff

- Click on **Delete** button

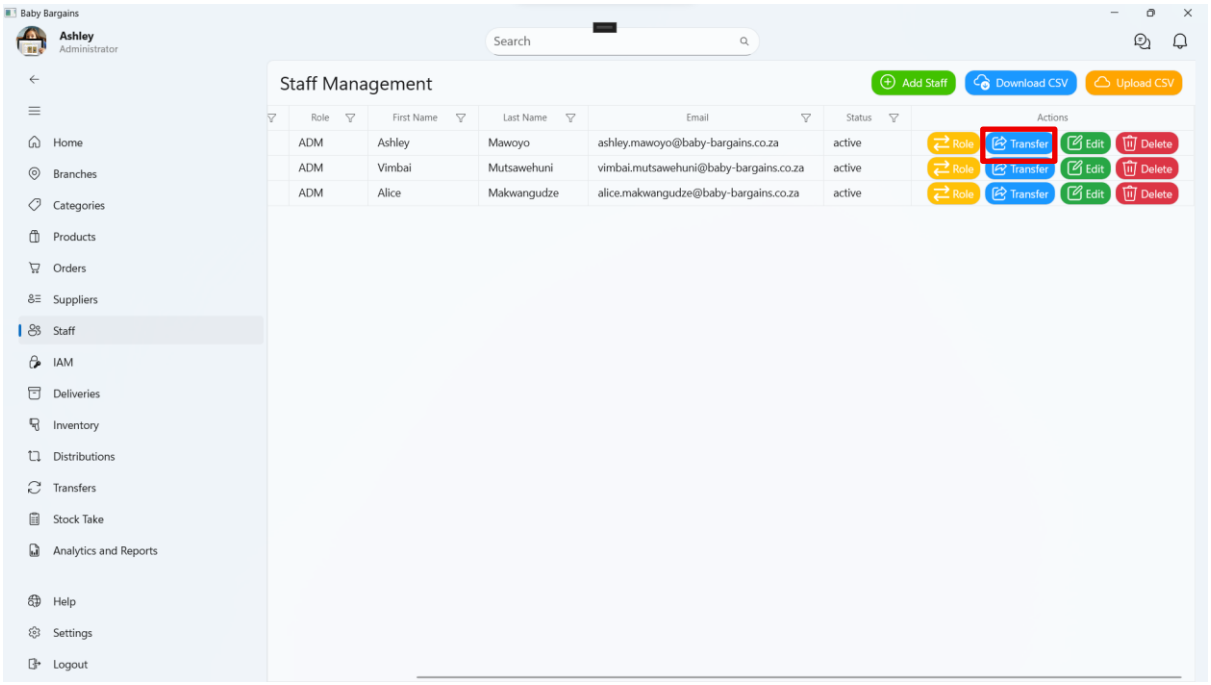

- A dialog pops up asking you to confirm

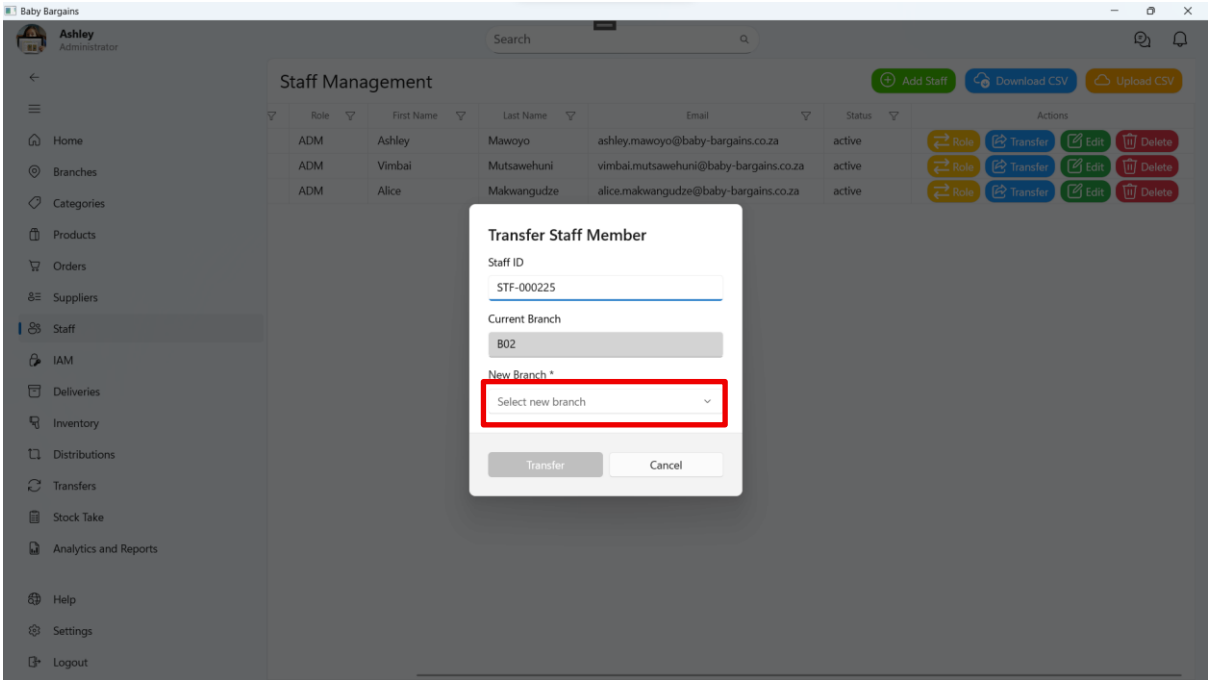

- After successful deletion the supplier and its products are deleted as well. Feedback is given via info bars

11.4 Transfer staff

- Click on **Transfer** button

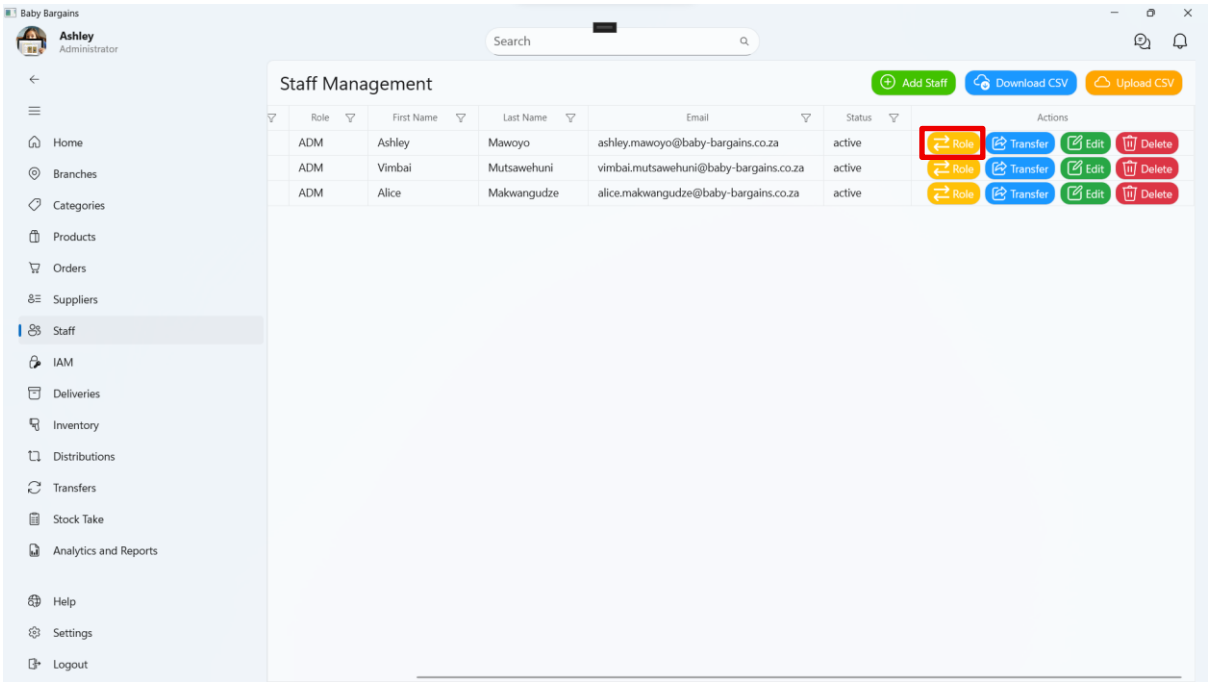

- Select branch to transfer to

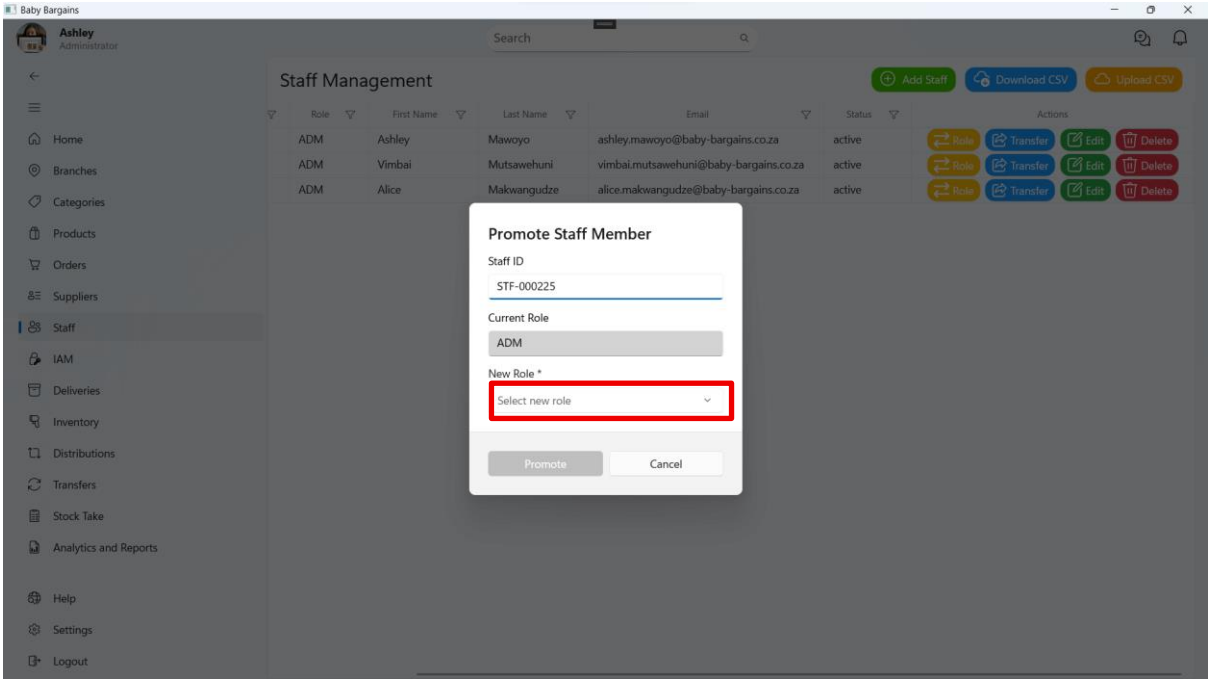

11.5 Change staff role

- Click on **Role button**

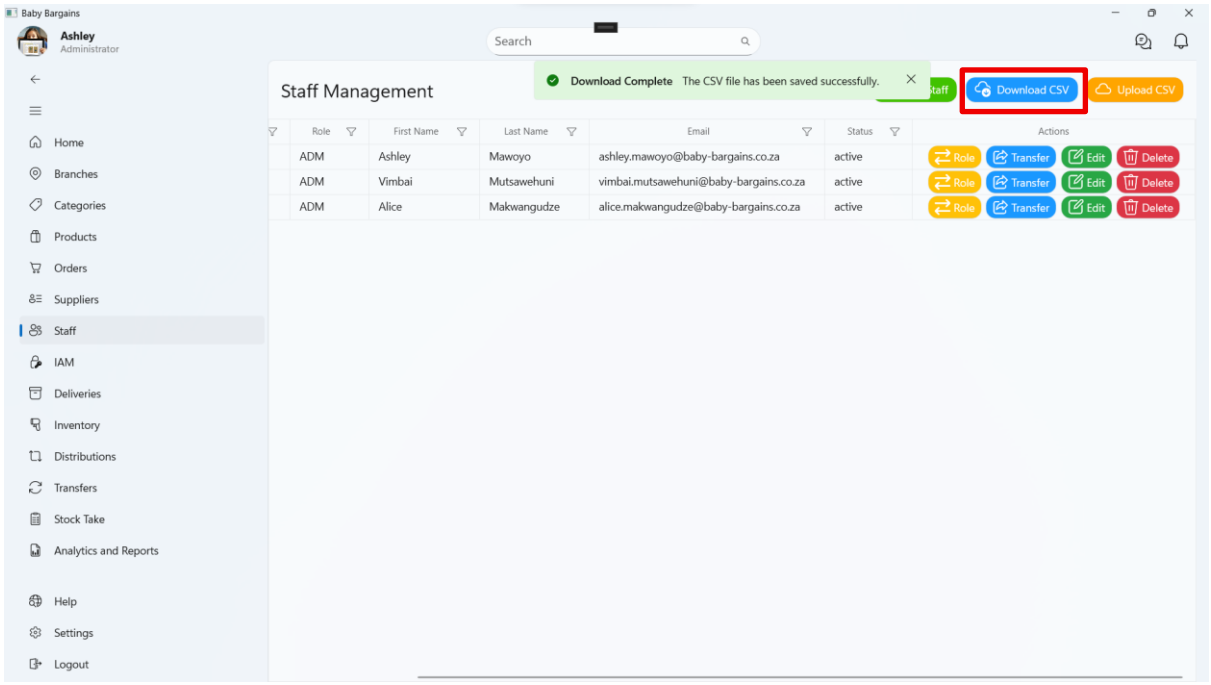

- Select role to change to

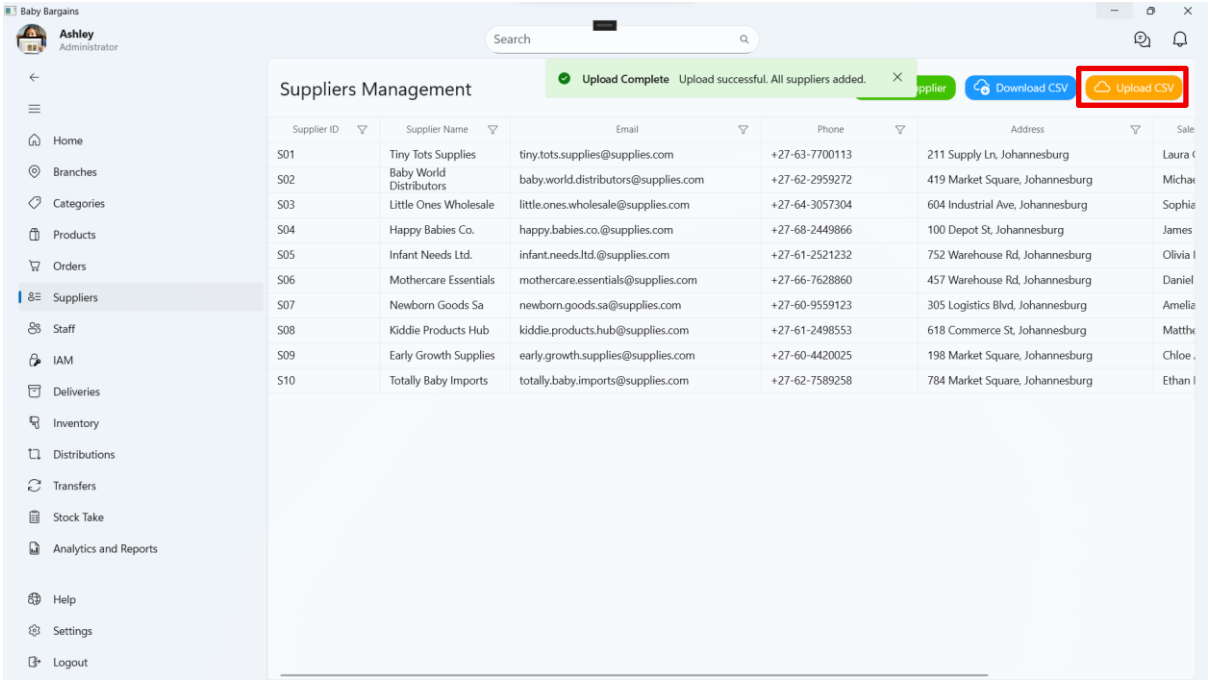

11.6 Download

- Click on **Download CSV** button. When download successful a green info bar with feedback pops up

11.7 Upload

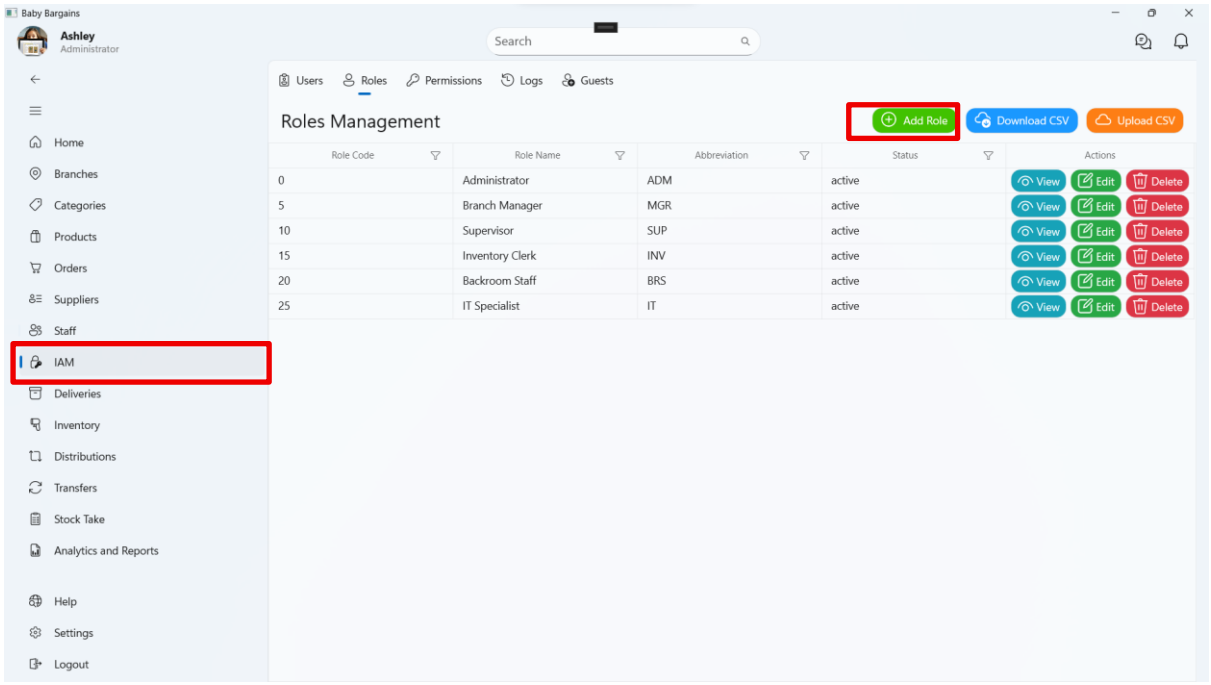

- Click on **Upload CSV** button. When download successful a green info bar with feedback pops up.
- CSV upload only works on initial setup when you have no suppliers available.

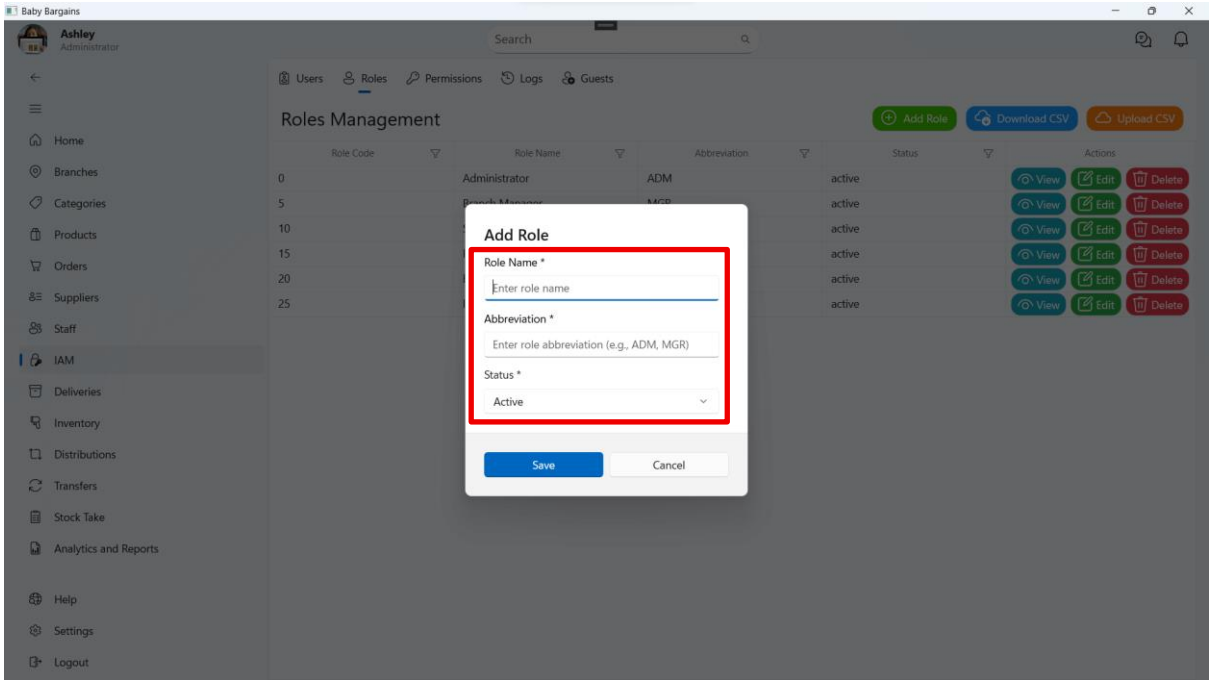

12. IAM: Role

12.1 Add role

- Navigate to IAM tab then Role selector and click on **Add Role** button

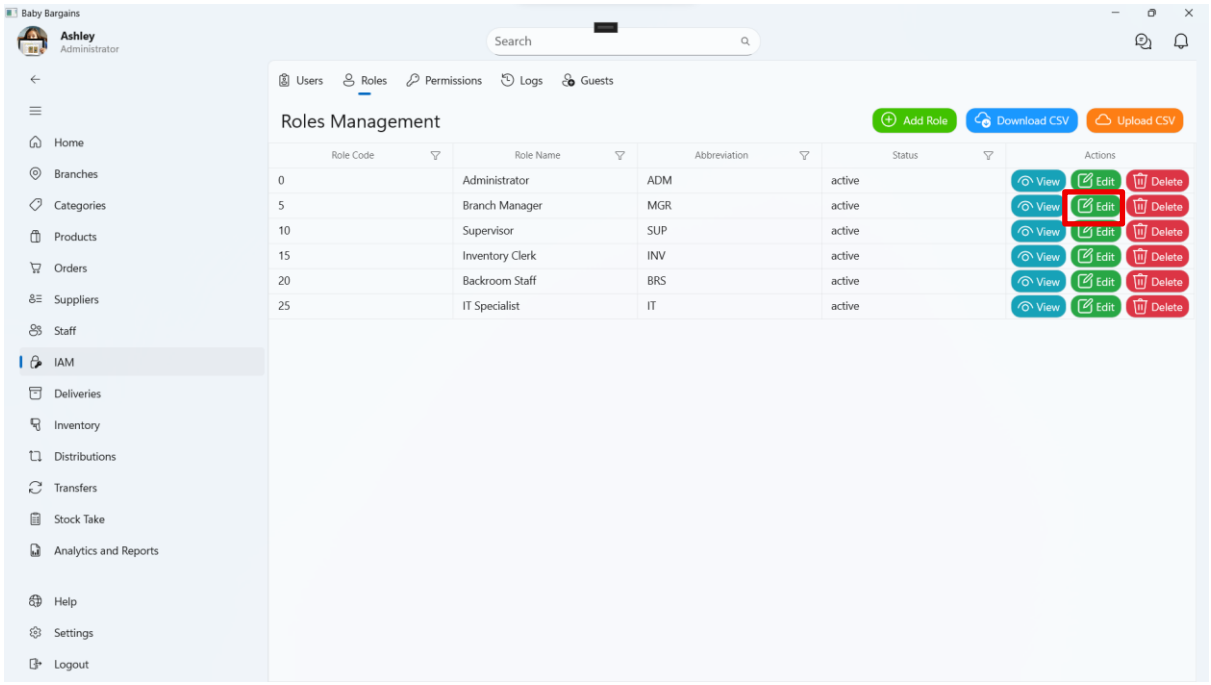

- A form will pop up and be asked to fill in the details required

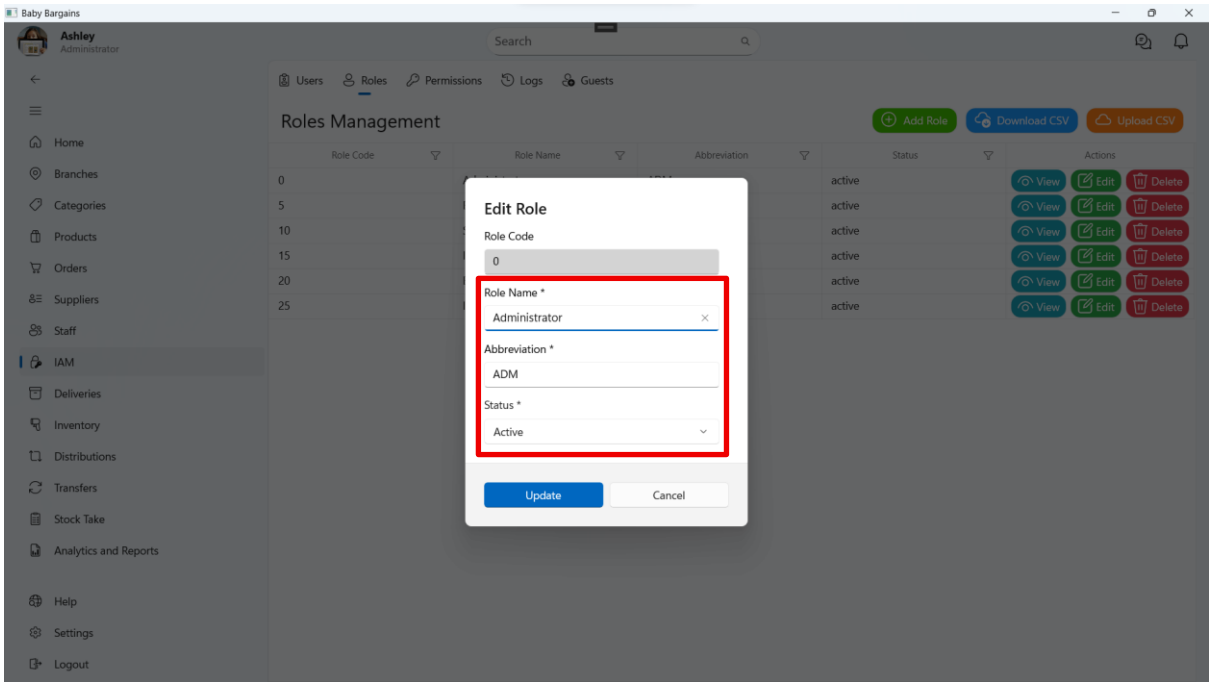

- An info bar will pop up if save success same for when an error occurs.
